Introduction

Welcome to your subscriber portal. In this user guide you will learn how to edit your account information, manage your services, add, remove and change your features along with many other useful pieces of information.

In addition to showing you how to edit various features and services, this guide will also provide detailed descriptions about each of the calling features your telephone service provides.

Logging in

To access the subscriber portal, you will need to open a web browser on your computer and type the following in the address bar:

Enter the login credentials in the spaces provided and click “Login” to be directed to the landing page (shown below).

Image 1.1

Note: Your default login credentials will consist of:

Username:

Password:

If you need assistance with logging in, please contact your telephone provider.

Navigation Bar, Sub-Menu and Page Layout

When you login to the subscriber portal, you'll see a page similar to image 2.1

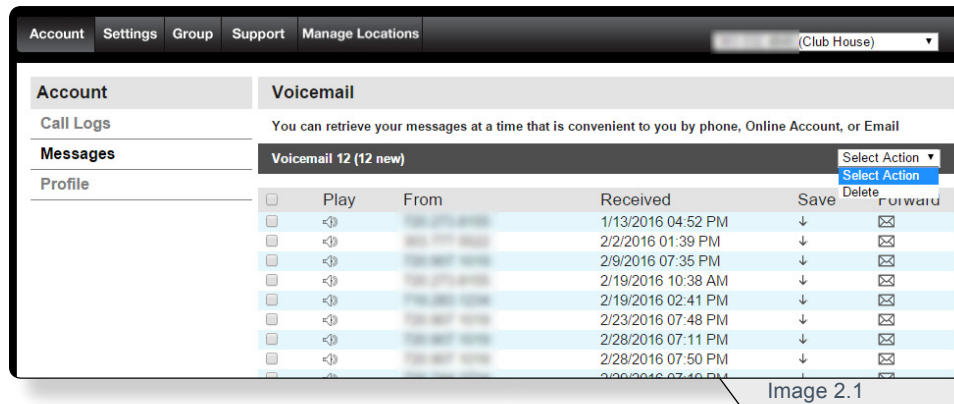

Image 2.1

The best way to move through the various screens is by using the navigation bar which is similar to image 2.2.

Image 2.2

Within the navigation bar, tabs are used to group customer and product details. Below is a brief description of each tab.

- **Account** – view or change account details.
- **Settings** – manage user level feature settings.
- **Group** – manage group level feature settings.
- **Support** – access support documents and applications.
- **Manage Locations** – switch between telephone service locations.

On the right of the navigation bar is a dropdown list of all phone numbers associated to this particular account and location. Before making any changes, ensure you have the correct phone number displayed so any changes are applied to the intended phone number.

Under each tab you will find a submenu bar similar to image 2.3. The header in bold is the submenu you are currently on and representative of the information the page displays.

Image 2.3

Account

The account tab is the default tab in the portal. This tab allows you to view and manage your call logs, messages and customer profile.

Call Logs

To view all incoming and outgoing calls for the past three months, use image 3.1 and the following instructions.

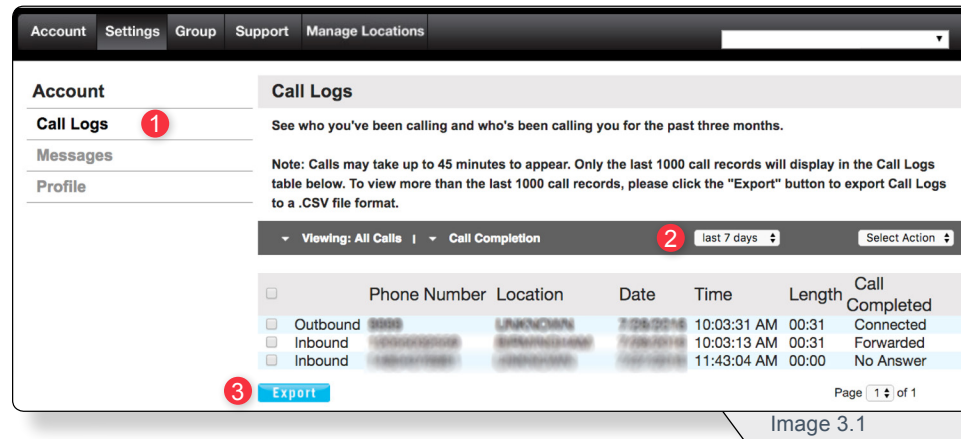

Image 3.1

- 1 – Select **Call Logs** on the **Account** submenu.
- 2 – Select the desired date ranges.
- 3 – Click **Export** to download a .csv file of the call log.

To block a number's future calls, use the following instructions and image 3.2.

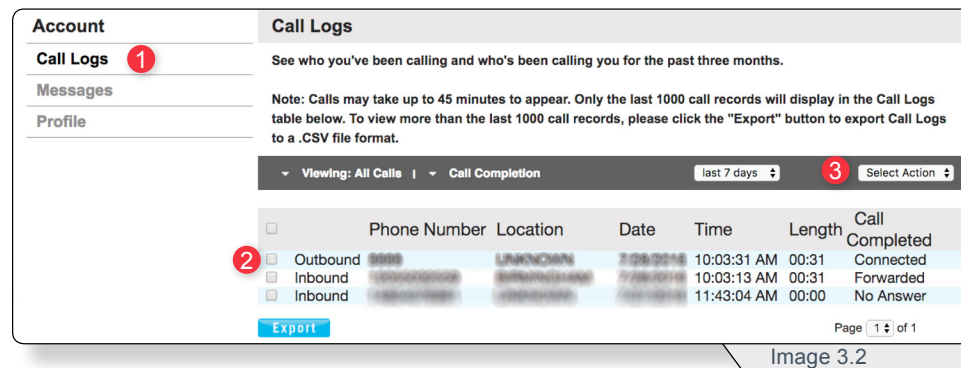

Image 3.2

- 1 – Select **Call Logs** on the **Account** submenu.
- 2 – Check the desired number.
- 3 – On the **Select Action** dropdown list, select **Block Number**.

Note: Selecting **Block Number** blocks the number without supplying a notification. Further management of call blocking is performed in that feature section.

Messages

To view a list of all new and saved messages, use image 4.1 and the following instructions.

- 1 – Click **Messages** on the **Account** submenu.

Note: The messages displayed are solely the messages of the number selected in the **Navigation Bar**'s phone number dropdown menu.

Once the messages are loaded you can:

- 2 – Click the audio icon to play a message.
- 3 – Click the down arrow to save a message.
- 4 – Click the envelope to forward a message to an email address.

If you select the Forward icon, a pop-up window similar to image 4.2 will load.

Enter the email address and select Send to have the voicemail sent to the entered email.

To delete voicemail, use image 4.3 and the following instructions.

- 1 – Check the box adjacent to the corresponding voicemail
- 2 – On the **Select Action** dropdown list, select **Delete**.

Profile

To view profile information for the phone number selected in the navigation bar, use image 5.1 and the following instructions.

Account Settings Group Support Manage Locations (Club House)

Account

Call Logs

Messages

Profile 1

Profile

Manage your account profile from this page

Customer Profile

Name Golf Course

Account Number 2100000043-01

E911 Info:
When you make a call, this address will be considered by your emergency personnel as your location.

[See 911 address List](#)

Account Password

We recommend you choose a strong password to protect your online profile.
The password length must be at least 6 characters.
The password must contain at least 1 number, at least 1 lower case letter, and at least 1 upper case letter.

Avoid using passwords that can be easily guessed such as your name, telephone number, social security number, or account number.

New Password

Verify New Password

Password Recovery

Save Cancel

Image 5.1

1 – Click **Profile** on the **Account** submenu.

On this page you can change the account's password and e911 address.

To change your password, fill out the fields with the desired information and click **Save**.

To view and manage your E911 address details, select **See 911 Address List** and a page similar to image 5.2 will load.

911 List View

Phone Number | Address

Phone Number	Address	Status	Temporary Update
3035324777	1805 Main ST LONGMONT, CO 80501	Active	Edit 1
3035324849	1805 Main ST LONGMONT, CO 80501	Active	Edit
7203784070	1805 Main ST LONGMONT, CO 80501	Active	Edit
7203784084	1805 Main ST LONGMONT, CO 80501	Active	Edit

Image 5.2

1 – Click **Edit** to change the E911 address associated to the account.

A page similar to image 5.3 will load.

Continued on the following page.

PROFILE

Please Fill in the Temporary, Current E911 Address For Phone Number 2059783419

Please allow 10 minutes for address to validate in our system after updating.

Street Number	Street Prefix (N,S,E,W)	Street Name	Street Type (Dr,Blvd,St)	Street Suffix (N,S,E,W)
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Unit		Floor	Building	(Fill in all that apply)
<input type="text"/>		<input type="text"/>	<input type="text"/>	
City		State	Zip Code	
<input type="text"/>		<input type="text"/>	<input type="text"/>	

Clicking Save will update the TN to a temporary address. Clicking Cancel will close the page. Clicking Reset will clear the address fields. Clicking Reset to Primary Address will update the TN back to the location's address and close the page.

Primary E911 Service Address [PLEASE READ - End user E911 Service Address Update Information](#)

Image 5.3

Note: Before making any changes, review the E911 information to understand the importance of E911. Review this information by selecting the **PLEASE READ – End user E911 Service Address Update Information** button.

Make any address changes or select **Reset to Primary Address** to have the primary address become the E911 address.

Any changes can take up to 10 minutes to complete the address validation. During this time, various pages will show the E911 status as **Pending**. When validation is complete, the status will change from **Pending** to **Active**.

Settings

To access an account's settings select **Settings** on the navigation bar. A page similar to image 6.1 will load.

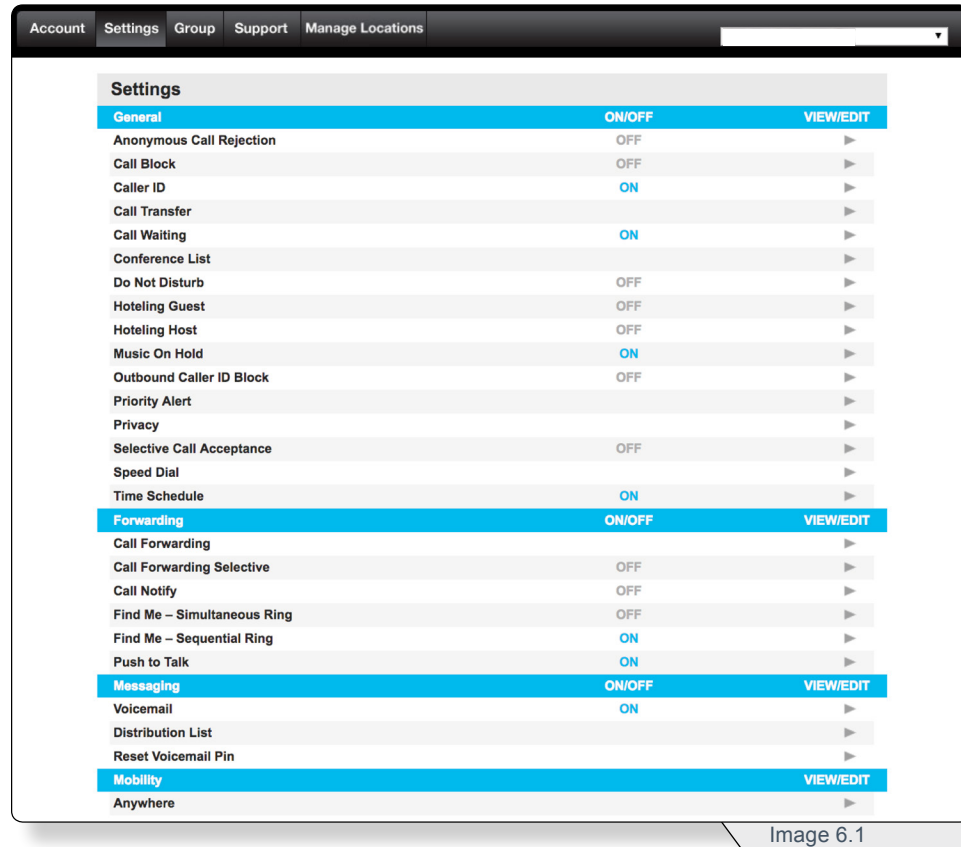

Image 6.1

The settings are divided into four sections:

- General
- Forwarding
- Messaging
- Mobility

Each individual feature is discussed in detail in the following sections of this document to follow.

To access any features, select the feature's corresponding **View/Edit** arrow.

Note: An account's feature set is determined by the service offering you have purchased so you may or may not all of the services listed in this example.

General Settings

Anonymous Call Rejection

Anonymous Call Rejection allows you to reject calls from callers who have blocked the display of their number. Only deliberate anonymous numbers are rejected. Callers whose numbers are unavailable are not rejected. Callers that are rejected are informed that you are not accepting calls from unidentified callers. Your phone does not ring and you do not receive any indication that they called.

Use image 7.1 and the following instructions to configure this feature.

- 1 – Click the **Anonymous Call Rejection's View/Edit** arrow.

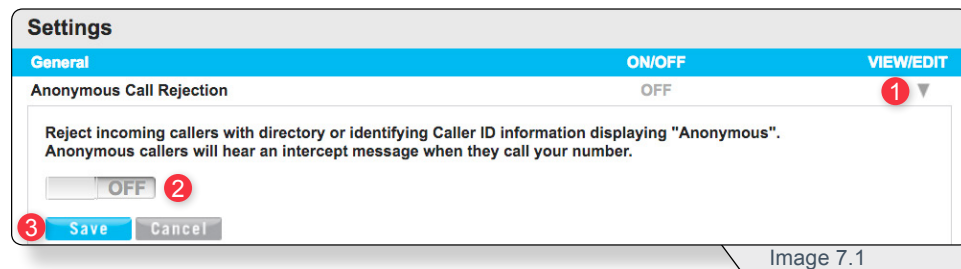

Image 7.1

- 2 – Select **On** or **Off**
- 3 – Click **Save** to apply the change.

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

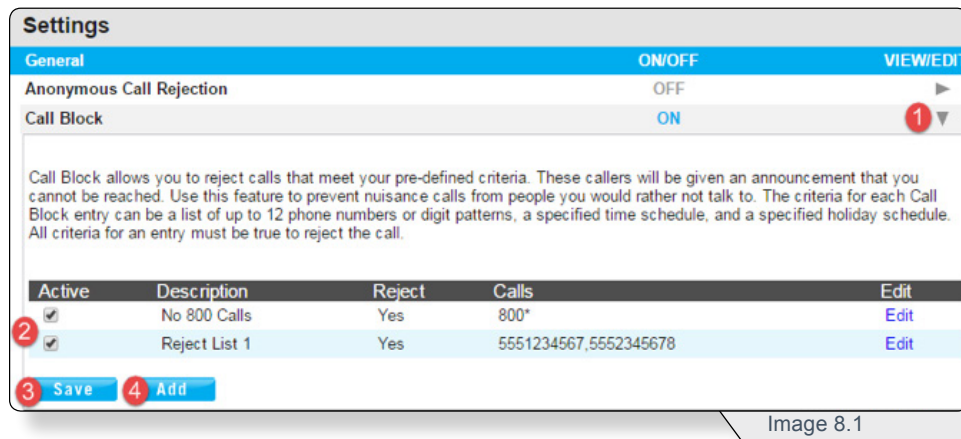

Call Block

Call Block rejects calls that meet your pre-defined criteria. Callers meeting these criteria will be played an automated message advising them that you cannot be reached. Use this feature to prevent nuisance calls.

Call Block rules can be applied to all incoming calls or up to 12 specified phone numbers or digit patterns (example: 800* for all 800 numbers). You can configure up to 10 rules. Therefore, you can specify a total of up to 120 phone numbers to be automatically rejected. For a call to be rejected, it must match all entered criteria.

Use image 8.1 and the following instructions to configure this feature.

- 1 – Click the **Call Block's View/Edit** arrow.

- 2 – Check the box to make any existing rule active.

- 3 – Click **Save** to apply changes.

To create a new **Call Block** rule, click **Add** (see 4 in image 8.1).

Continued on the following page.

CALL BLOCK

A page similar to image 8.2 will load.

Settings - Call Block

Description:

☒ Reject Call
☐ Do not Reject Call

Select Time Schedule:

Selected Holiday Schedule:

☒ From Any Phone number
☐ Forwarded
☐ From following phone numbers
 ☐ Any Private Number
 ☐ Any Unavailable Number

Specific Phone Numbers

Image 8.2

Fill in the fields with the desired information.

See additional information for select fields below.

Time Schedule – Select one of the available options. Refer to the **Time Schedule** section for instructions on how to create a time schedule.

From Any Phone number – Use to reject all incoming calls.

Forwarded – Use to reject any call forwarded from another number.

From following phone numbers – Use to reject any numbers in the **Specific Phone Numbers** section.

Any Private Number – Use to reject all calls any caller with their number to private.

Any Unavailable Number – Use to reject any call where caller ID is not available.

Click **Save** to make any changes.

Caller ID

Caller ID shows an incoming caller's name and/or telephone number.

Use image 9.1 and the following instructions to configure this feature.

- 1 – Click the **Caller ID's View/Edit** arrow.

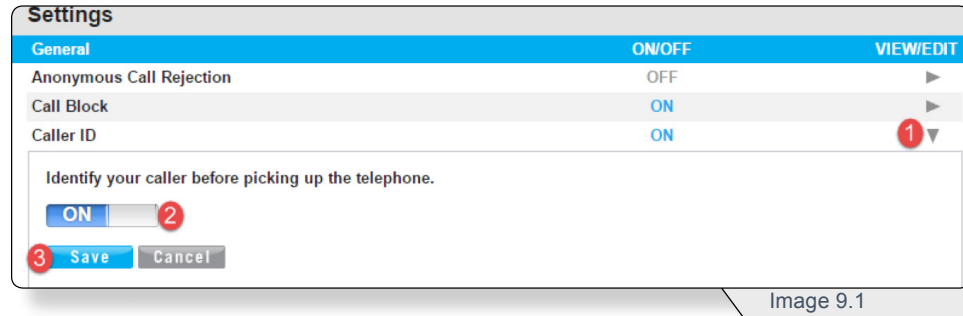

Image 9.1

- 2 – Select **On** or **Off**.
- 3 – Click **Save** to apply any changes.

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Call Transfer

Call Transfer enables a user to transfer a call to a specified destination, and can take place in one of three ways:

Blind – the party receiving the transferred call receives the call directly.

Third-party consultation – the party receiving the transferred call receives a call from you and then when you press a button, the call is transferred.

Three-way consultation – all parties are on the line at the same time.

Use image 10.1 and the following instructions to configure this feature.

- 1 – Click **Call Transfer's View/Edit** arrow.

The screenshot shows a 'Settings' window with a 'Call Transfer' section. The section is expanded, showing a description of the feature and several configuration options. Red numbered callouts (1-8) point to specific elements: 1 points to the 'View/Edit' arrow, 2 points to the 'Call transfer Recall' radio buttons, 3 points to the 'Number of rings before recall' dropdown, 4 points to the 'Enable Busy Camp On' checkbox, 5 points to the 'Seconds' input field, 6 points to the 'Use Diversion inhibitor for Blind Transfer' radio buttons, 7 points to the 'Use Diversion inhibitor for Consultative Calls' radio buttons, and 8 points to the 'Save' button.

General	ON/OFF	VIEW/EDIT
Anonymous Call Rejection	OFF	▶
Call Block	OFF	▶
Caller ID	ON	▶
Call Transfer		1 ▼

The Call Transfer service enables a user to transfer a call to a specified destination. Call transfer can be blind, with third-party consultation, or with three-way consultation. In addition, Busy Camp On and Call Transfer Recall features allow users to camp the call to transfer on a busy destination and recall the transferring party if the transferred call is not answered for any reason. Another option, diversion inhibitor enables users to prevent transferred calls from being redirected.

2 Call transfer Recall: ☐ On ☒ Off

Configure Call Transfer Recall:

3 Number of rings before recall: 4

4 ☐ Enable Busy Camp On for 120 5 Seconds

6 Use Diversion inhibitor for Blind Transfer: ☐ On ☒ Off

7 Use Diversion inhibitor for Consultative Calls: ☐ On ☒ Off

8 Save

Image 10.1

- 2 – Select **On** or **Off** for call transfer recall which redirects unanswered transferred calls back to you.
- 3 – Specify the number of rings before the transferred call is redirected back to the original number.
- 4 – Check to enable the capability to transfer calls to a phone number that is already busy.
- 5 – Specify the number of seconds a call sent to a busy line will wait before the transferred call is redirected back to the original number.
- 6 – Prevent blind transferred calls from being further redirected by services such as **Call Forwarding** or **Simultaneous Ring**.
- 7 – Prevents consultative transferred calls from being further redirected by services such as **Call Forwarding** or **Simultaneous Ring**.
- 8 – Click **Save** to apply any changes.

Call Waiting

Call Waiting notifies of an incoming call when the line is already on another call.

Use image 11.1 and the following instructions to configure this feature.

- 1 – Click **Call Waiting's View/Edit** arrow.

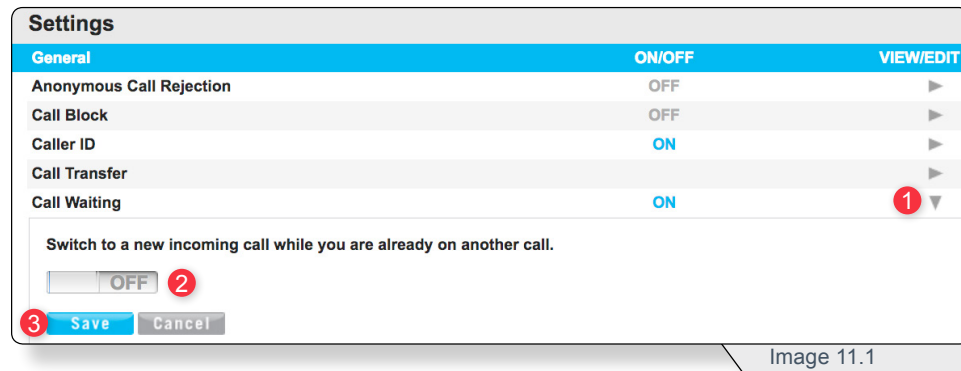

Image 11.1

- 2 – Select **On** or **Off**.
- 3 – Click **Save** to apply any changes.

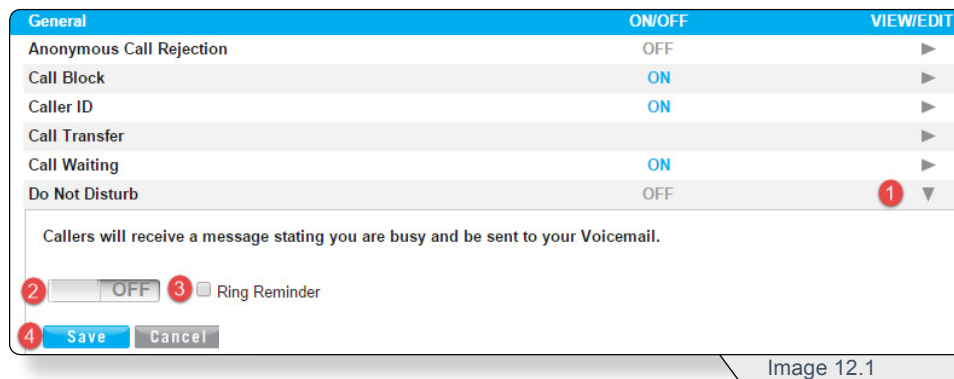

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Do Not Disturb

When **Do Not Disturb** is enabled, incoming callers receive a message stating you are busy, and will subsequently be sent to your voicemail greeting.

Use image 12.1 and the following instructions to configure this feature.

- 1 – Click **Do Not Disturb's View/Edit** arrow.

- 2 – Select **On** or **Off**.
- 3 – Check the box to have a single ring sent to the phone whenever a call is forwarded to voicemail.
- 4 – Click **Save** to apply any changes.

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Hoteling

Hoteling enables mobile users to share phones on an as-needed basis, like a hotel room.

Hoteling enables users to log in to a host account via their web portal or voice portal. Once logged in, the employee can use that host phone to make and receive their calls as usual, while retaining their own user profile.

Configuring **Hoteling** is a two-step process that starts with configuring the host(s) and then the guest(s) that will use the host. Both sections follow below.

HOTELING HOST

Configure Hoteling Host on your line when you want to allow a guest user to have temporary access to using your phone.

Use image 13.1 and the following instructions to configure this feature.

1 – Click **Hoteling Host's View/Edit** arrow.

Image 13.1

2 – Select **On** or **Off**.

3 – Check to limit the user's access to the host phone to 24 hours.

4 – Select one of the following access levels:

- **Enterprise** – anyone in your company can use the designated phone to “hotel.”
- **Group** – only a specified group (ex. employees in a single region) can use the designated phone to “hotel.”

5 – Click **Save** to apply any changes.

HOTELING GUEST

Hoteling Guest allows users to associate their service profiles with a phone that has Hoteling Host enabled.

Use image 14.1 and the following instructions to configure this feature.

- 1 – Click **Hoteling Guest's View/Edit** arrow.

The screenshot shows the 'Settings' window for 'Hoteling Guest'. At the top, there are tabs for 'General', 'ON/OFF', and 'VIEW/EDIT'. The 'VIEW/EDIT' tab is selected, indicated by a red circle with the number 1. Below the tabs, the 'Hoteling Guest' status is shown as 'OFF'. A descriptive text explains that Hoteling Guest allows a user to associate their service profile with a Hoteling Host user. Below this, there are two radio buttons for 'Hoteling Guest': 'On' and 'Off'. The 'Off' option is selected, indicated by a red circle with the number 2. To the right of the radio buttons is a checkbox labeled 'Limit Association to' followed by a text input field containing '12' and the word 'Hours'. This checkbox is checked, indicated by a red circle with the number 3. Below the checkbox, there are two columns: 'Available Host' and 'Associated Host'. The 'Available Host' column contains a list of host accounts, with a red circle with the number 4 pointing to the first one. The 'Associated Host' column is currently empty, with a red circle with the number 6 pointing to it. A right-pointing arrow button is located between the two columns, with a red circle with the number 5 pointing to it. At the bottom left of the settings window is a 'Save' button, with a red circle with the number 7 pointing to it.

Image 14.1

- 2 – Select **On** or **Off**.
- 3 – Set the Hoteling Guest to automatically expire by checking the **Limit Association** box and specify a maximum number of hours.

Note: If the host has enforced an association limit of 24 hours, the guest account cannot exceed that amount.

- 4 – Select the desired host account from **Available Hosts**.
- 5 – Click the right arrow.
- 6 – View the host as a now **Associated Host**.
- 7 – Click **Save** to apply any changes.

Music On Hold

Music On Hold specifies whether or not music will be played when callers are placed on hold or parked. For this feature to function, **Music On Hold** must also be enabled under the group tab settings (refer to the **Music on Hold** section under the **Group Feature Settings** header).

Use image 15.1 and the following instructions to configure this feature.

- 1 – Click **Music on Hold**'s **View/Edit** arrow.

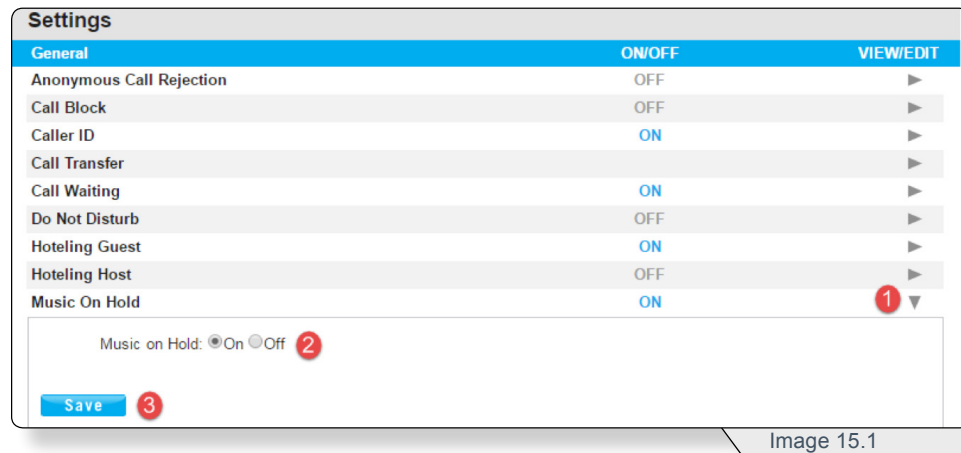

Image 15.1

- 2 – Select **On** or **Off**.
- 3 – Click **Save** to apply any changes.

Outbound Caller ID Block

Outbound Caller ID Block blocks your number from displaying in the receiver's caller ID display.

Use image 16.1 and the following instructions to configure this feature.

- 1** – Click **Outbound Caller ID Block's View/Edit** arrow.

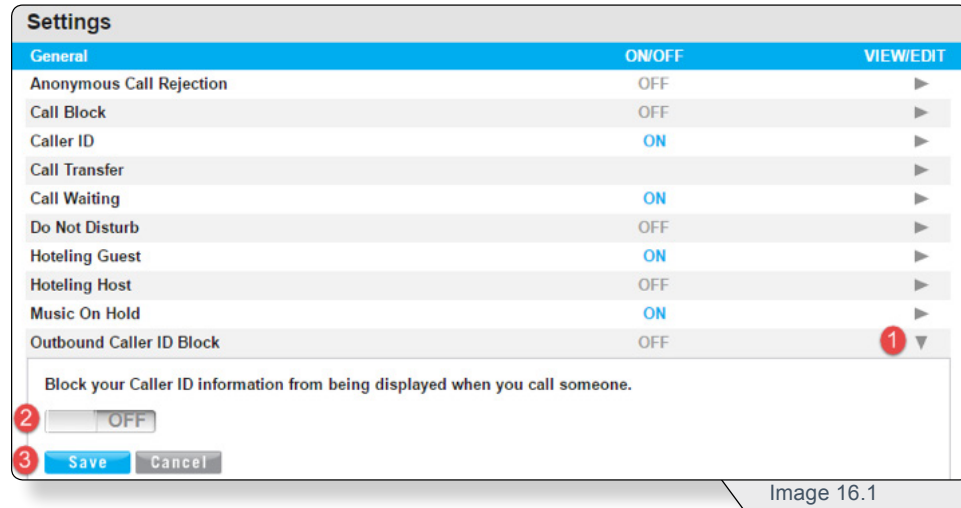

Image 16.1

- 2** – Select **On** or **Off**.
- 3** – Click **Save** to apply any changes.

Priority Alert

Priority Alert allows you to assign a distinctive ring tone to based on your pre-defined criteria. Priority alert rules can be applied all incoming calls or to up to 12 specified phone numbers or digit patterns (example: 800* for all 800 numbers).

Note: All criteria for a call must be met for the phone to ring with a different tone.

Use image 17.1 and the following instructions to configure this feature.

1 – Click **Priority Alert’s View/Edit** arrow.

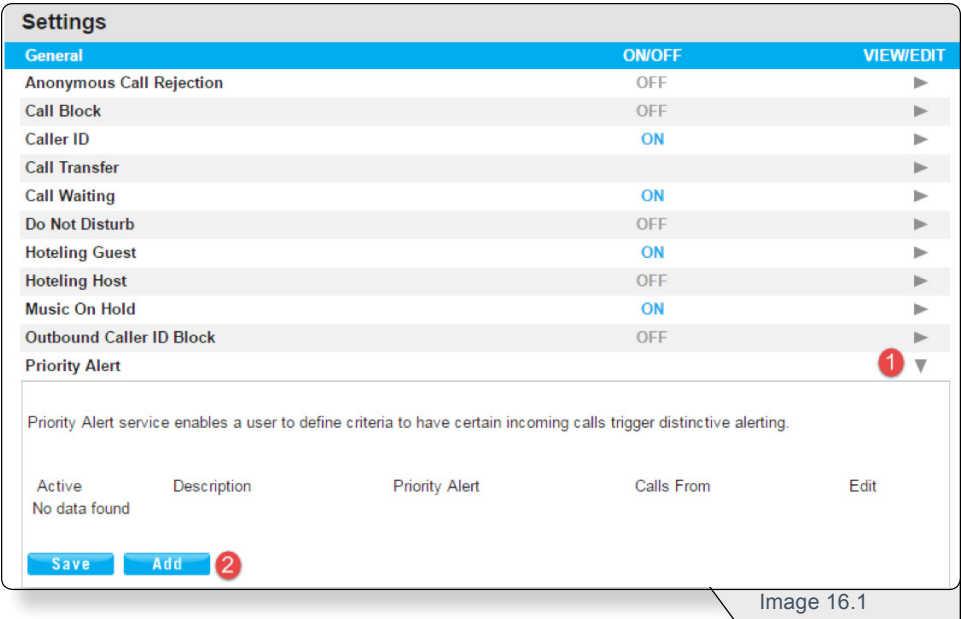

Image 16.1

2 – Click **Add** to create a new rule.

Continued on the following page.

PRIORITY ALERT

A rule configuration page similar to image 17.2 will load.

Settings - Priority Alert

Description:

☒ Use Priority Alert
☐ Do Not Use Priority Alert

Select Time Schedule:

Selected Holiday Schedule:

☒ Any External Phone number
☒ Following Phone Numbers:
☐ Any Private Number
☐ Any Unavailable Number

Specific Phone Numbers

Image 17.2

Fill in the fields with the desired information.

See additional information for select fields below.

Time Schedule – Select one of the available options. Refer to the Time Schedule section for instructions on how to create a time schedule.

Any External Phone number – Use to reject all incoming calls.

Following Phone Numbers – Use to reject any numbers in the Specific Phone Numbers section.

Any Private Number – Use to reject all calls any caller with their number to private.

Any Unavailable Number – Use to reject any call where caller ID is not available.

Click **Save** to apply any changes.

You will return to the **Priority Alert** page but will notice a new rule. This will appear similar to image 17.3

Priority Alert

Priority Alert service enables a user to define criteria to have certain incoming calls trigger distinctive alerting.

Active	Description	Priority Alert	Calls From	Edit
<input checked="" type="checkbox"/>	My Priority Alert Rule 1	Yes	Any private number, Any unavailable number, 5553331212	Edit

Image 17.3

New alert rules are set to active by default. Deactivate an alert rule by deselecting the corresponding check box (see **1** in image 17.3). When finished, click **Save** (see **2** in image 17.3) to apply your changes.

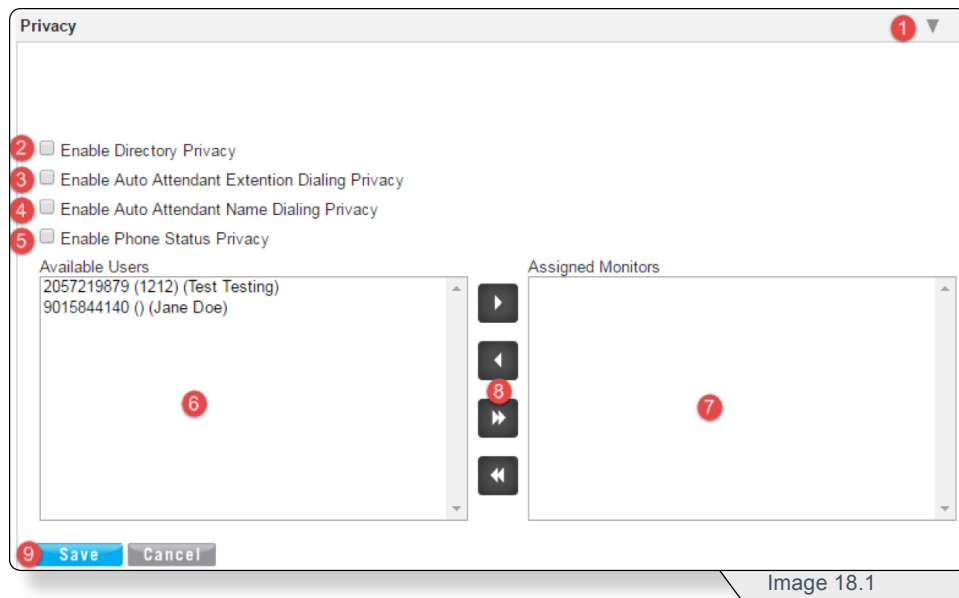

To modify any alert rules at any time, click the corresponding **Edit** button (see **3** in image 17.3).

Privacy

The **Privacy** feature allows you to exclude phone numbers from organization Directory Lists, Auto Attendant Extension Dialing, Auto Attendant Name Dialing and Phone Status monitoring.

Use image 18.1 and the following instructions to configure this feature.

1 – Click **Privacy's View/Edit** arrow.

To enable privacy services, select one or more of the four available checkboxes. The options are:

- 2 – Enable Directory Privacy** – your telephone number will not appear in the enterprise or group directory.
- 3 – Enable Auto Attendant Extension Dialing Privacy** – your telephone extension will be excluded from any auto attendant.
- 4 – Enable Auto Attendant Name Dialing Privacy** – your name will not appear in the auto attendant name-dialing directory.
- 5 – Enable Phone Status Privacy** – your phone number or extension status is not viewable.

By default, the phone status privacy rule will apply to all users. You can select users who are allowed to monitor your phone status by highlighting them in the **Available Users** list (see **6** in image 18.1) and moving them to the **Assigned Monitors** list (see **7** in image 18.1) by clicking the appropriate arrow button (see **8** in image 18.1).

Click **Save** (see **9** in image 18.1) to continue.

Selective Call Acceptance

Selective Call Acceptance allows you to limit the calls you receive based on your own predefined criteria. Selective acceptance rules can be applied to all incoming calls or to up to 12 specified phone numbers or digit patterns (example: 800* for all 800 numbers).

Note: All criteria for a call must be met for the call to be accepted or denied based on rule configuration.

Calls that do not meet the criteria will receive a message stating: “The party you are trying to reach is not accepting calls at this time” and will not go to voicemail.

Use image 19.1 and the following instructions to configure this feature.

1 – Click **Priority Alert**'s **View/Edit** arrow.

Image 19.1

2 – Click **Add** to create a new rule.

Continued on the following page.

SELECTIVE CALL ACCEPTANCE

A rule configuration page similar to image 19.2 will load.

The form is titled "Selective Call Acceptance" and contains the following fields and options:

- Description:** A text input field.
- Acceptance:** Two radio buttons: "Accept Call" (selected) and "Do Not Accept Call".
- Select Time Schedule:** A dropdown menu with "Every Day All Day" selected.
- Selected Holiday Schedule:** A dropdown menu with "None" selected.
- Phone Number Selection:** Three radio buttons: "Any Phone number" (selected), "Following Phone Numbers", and "Any Private Number".
- Any Private Number:** A checkbox.
- Any Unavailable Number:** A checkbox.
- Specific Phone Numbers:** A table with 4 rows and 3 columns for entering specific phone numbers.
- Buttons:** "Save" (blue) and "Cancel" (grey).

Image 19.2

Fill in the fields with the desired information.

See additional information for select fields below.

Time Schedule – Select one of the available options. Refer to the Time Schedule section for instructions on how to create a time schedule

Any Phone number – Use to reject all incoming calls.

Following Phone Numbers – Use to reject any numbers in the Specific Phone Numbers section.

Any Private Number – Use to reject all calls any caller with their number to private.

Any Unavailable Number – Use to reject any call where caller ID is not available.

Click **Save** to apply any changes.

You will return to the **Selective Call Acceptance** page but will notice a new rule. This will appear similar to image 17.3

The table shows a list of rules with columns: Active, Description, Accept, Calls From, and Edit. A red circle with the number 1 is next to the first rule, and a red circle with the number 2 is next to the Save button. A red circle with the number 3 is next to the Edit button.

Active	Description	Accept	Calls From	Edit
<input checked="" type="checkbox"/>	Priority calls	Yes	5554443333,5554443332	Edit

Image 19.3

New alert rules are set to active by default. Deactivate an alert rule by deselecting the corresponding check box (see 1 in image 19.3). When finished, click **Save** (see 2 in image 19.3) to apply your changes.

To modify any alert rules at any time, click the corresponding **Edit** button (see 3 in image 17.3).

Speed Dial

Speed Dial allows you to set up quick dial shortcuts for your most frequent calls.

Use image 20.1 and the following instructions to configure this feature.

- 1 – Click **Speed Dial's View/Edit** arrow.

- 2 – Click **Add Contact** to add a new speed dial entry.

A page similar to image 20.2 will load.

Image 20.2 shows the 'Add Speed Dial Contact' form. It contains the following fields: First Name, Last Name, Home Phone, Work Phone, Mobile Phone, Primary Phone (with a dropdown menu set to 'Home'), and Speed Dial Code (with a dropdown menu). At the bottom right, there are 'Save' and 'Cancel' buttons. The caption 'Image 20.2' is at the bottom right.

Enter all the desired information for the contact. See additional information for select fields below.

Primary Phone – The number selected here will be the number called when the speed dial code is used on your phone.

Speed Dial Code – Select an option from the available two digit numbers.

Click **Save** to apply any changes. You will return to the **Speed Dial** page but will notice a new rule. This will appear similar to image 20.3

Delete an alert rule by deselecting the corresponding check box (see 1 in image 20.3) and click **Delete** (see 2 in image 20.3).

To modify any entry at any time, click the corresponding **Edit** button (see 3 in image 20.3).

Time Schedule

Time Schedule allows you to create and customize multiple schedules. Many other features use time schedules.

Use image 21.1 and the following instructions to configure this feature.

1 – Click **Time Schedule's View/Edit** arrow.

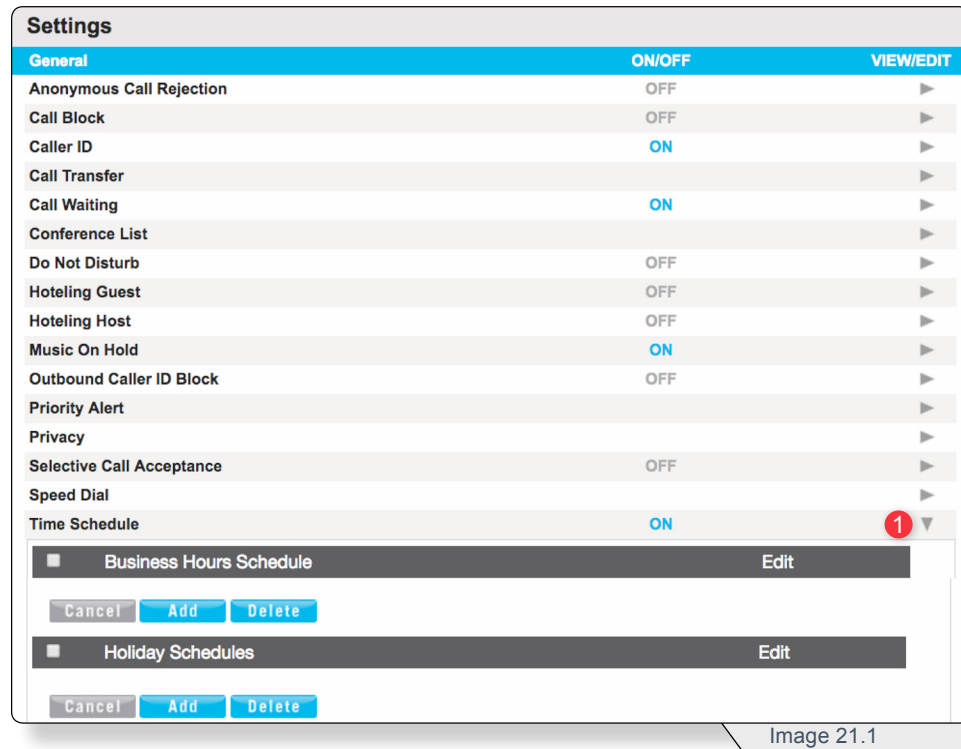

Image 21.1

The process of creating a **Business Hours Schedule** and a **Holiday Schedule** are essentially the same.

Click **Add** to begin the process of creating a schedule. A page similar to image 21.2 will load

Image 21.2

Name the schedule and click **Save** to continue.

TIME SCHEDULE

Clicking **Save** will cause an empty event list to be added to the page (similar to image 21.3).

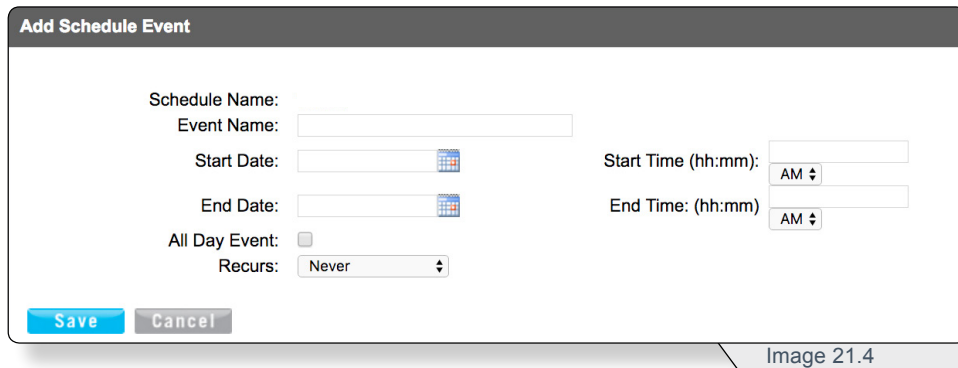

A dialog box titled "Add Business Hours Schedule". It contains a text input field labeled "Schedule Name:". Below the input field are four buttons: "Save" (blue), "Add" (blue), "Delete" (blue), and "Cancel" (grey).

Image 21.3

Name the schedule, Click **Save** and then Click **Add** to configure an event.

A page similar to image 21.4 will load.

A dialog box titled "Add Schedule Event". It contains several fields: "Schedule Name:" (text input), "Event Name:" (text input), "Start Date:" (calendar icon), "End Date:" (calendar icon), "Start Time (hh:mm):" (text input with "AM" dropdown), "End Time (hh:mm):" (text input with "AM" dropdown), "All Day Event:" (checkbox), and "Recurs:" (dropdown menu showing "Never"). At the bottom are "Save" (blue) and "Cancel" (grey) buttons.

Image 21.4

Fill in each field with the desired entry for this rule.

To provide clarity, below are examples of the options in the **Recurs** field.

- Daily (Example: Reoccurs every one or two days)
- Weekly (Example: Every week on Tuesday and Thursday)
- Monthly by day (Example: Every month on the 15th)
- Monthly by Week (Example: First Monday of every month)
- Yearly by Day (Example: January 5th every year)
- Yearly by Week (Example: Second Tuesday in February every 2 years)

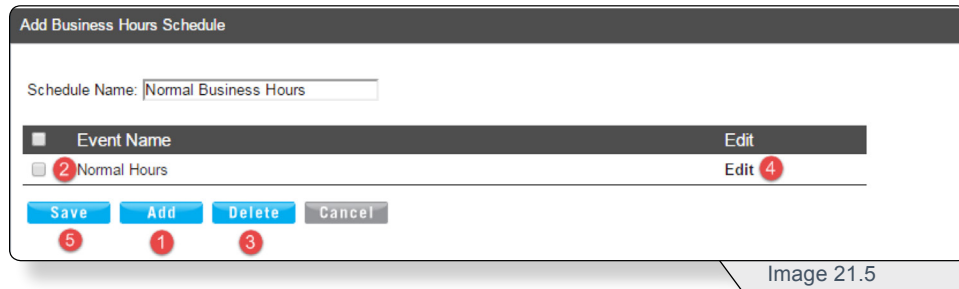

When finished, click **Save** to save the event.

Continued on the following page.

TIME SCHEDULE

The event will be displayed in the **Add Schedule** view similar to image 21.5.

To add additional schedules, click **Add** (see **1** in image 21.5) and repeat the steps as above.

To delete a time schedule, check the box next to the schedule's name (see **2** in image 21.5) and click **Delete** (see **3** in image 21.5).

To make changes to an existing time schedule, click **Edit** (see **4** in image 21.5).

When finished, click **Save** (see **5** in image 21.5).

Once a schedule has been created, it is displayed on the main **Time Schedule** page similar to image 21.6.

To add additional time schedules, click **Add** (see **1** in image 21.6) and repeat the steps as above.

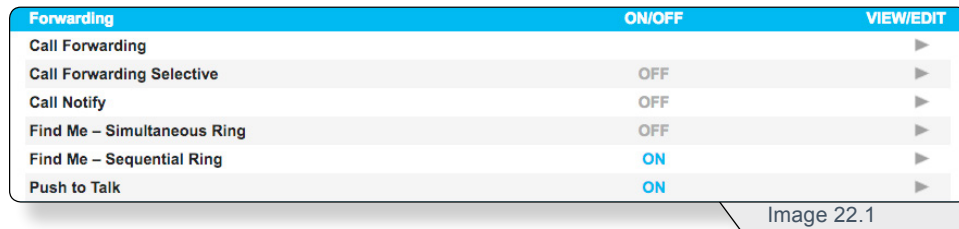

To delete a time schedule, check the box next to the schedule's name (see **2** in image 21.6) and click **Delete** (see **3** in image 21.6).

To make changes to an existing time schedule, click **Edit** (see **4** in image 21.6).

Forwarding

Each feature in the **Forwarding** section involves routing incoming calls to other phone numbers.

The **Forwarding** section can be found on the settings page similar to image 22.1.

Forwarding	ON/OFF	VIEW/EDIT
Call Forwarding		▶
Call Forwarding Selective	OFF	▶
Call Notify	OFF	▶
Find Me – Simultaneous Ring	OFF	▶
Find Me – Sequential Ring	ON	▶
Push to Talk	ON	▶

Image 22.1

Call Forwarding

Call Forwarding specifies when calls should be forwarded to another phone number and the phone number(s) where the calls should be forwarded.

Use image 23.1 and the following instructions to configure this feature.

Click **Call Forwarding's View/Edit** arrow

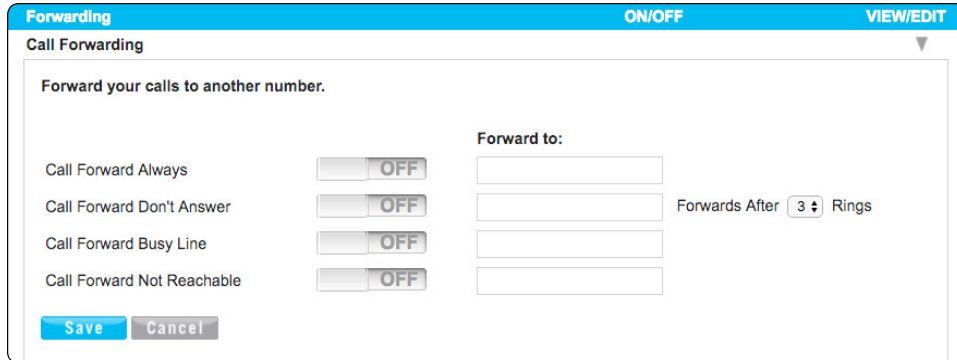

Image 23.1

Forwarding can be configured four ways:

- **Call Forward Always** – If enabled, all incoming calls will be forward to another number.
- **Call Forward Don't Answer** – If enabled, all unanswered incoming calls will be forwarded to another phone number.
- **Call Forward Busy Line** – If enabled, any incoming call that reaches this line when it is in use will be forwarded to another phone number.
- **Call Forward Not Reachable** – If enabled, any incoming call that reaches this line when it cannot be reached due to a service issue will be forwarded to another phone number.

Use the corresponding toggle buttons to turn the features **On** or **Off**.

Use the **Forward to** text boxes to specify the number where the call should be forwarded.

For **Call Forward Don't Answer**, specify the number of times the call should ring before forwarding.

When finished, click **Save** to apply any changes.

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Call Forwarding Selective

Call Forwarding Selective allows you to forward specific calls matching pre-defined criteria to a different phone number. **Call Forwarding Selective** rules can be applied all incoming calls or to up to 12 specified phone numbers or digit patterns (example: 800* for all 800 numbers).

Note: All criteria must be met for a call to be forwarded.

Use image 24.1 and the following instructions to configure this feature.

- 1 – Click **Call Forwarding Selective's View/Edit** arrow.

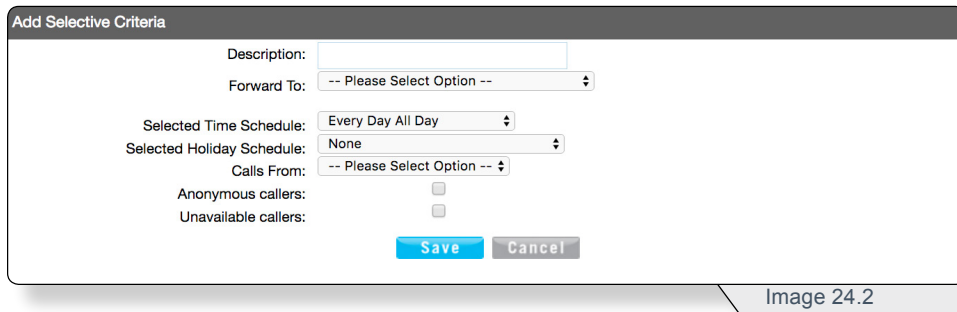

Image 24.1

- 2 – Turn **Call Forwarding Selective** on.
- 3 – Enter a phone number for the calls to be forwarded.
- 4 – Check this box to receive notification when receiving a forwarded call.
- 5 – Click **Save**.
- 6 – Click **Add**.

Continued on the following page.

CALL FORWARDING SELECTIVE

An **Add Selective Criteria** window similar to image 24.2 will load.

The 'Add Selective Criteria' window contains the following fields and controls:

- Description:
- Forward To:
- Selected Time Schedule:
- Selected Holiday Schedule:
- Calls From:
- Anonymous callers: ☐
- Unavailable callers: ☐
- Buttons: **Save** (blue), **Cancel** (grey)

Image 24.2

Fill in the fields with the desired information.

See additional information for select fields below.

Time Schedule – Select one of the available options. Refer to the **Time Schedule** section for instructions on how to create a time schedule.

Any Phone number – Use to forward all incoming calls.

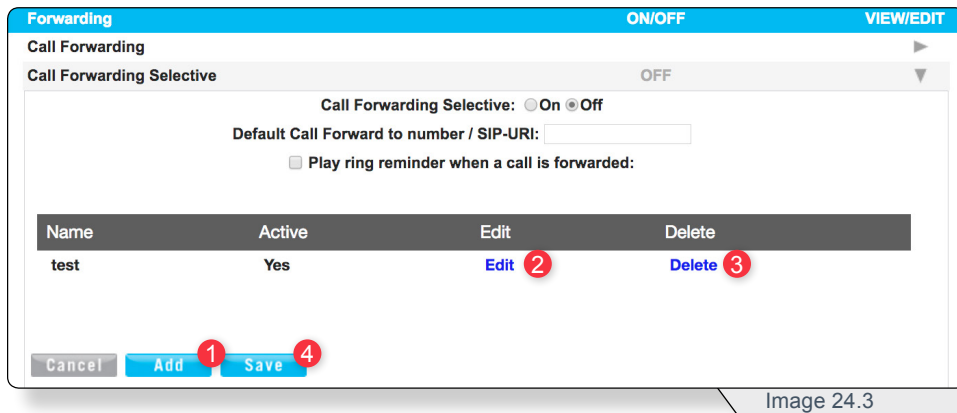

Following Phone Numbers – Use to forward any numbers in the **Specific Phone Numbers** section.

Anonymous Callers – Use to forward all calls any caller with their number to private.

Unavailable Callers – Use to forward any call where caller ID is not available.

Click **Save** to apply any changes.

Clicking **Save** will return you to the **Call Forwarding Selective** feature page similar to image 24.3.

The 'Call Forwarding Selective' page includes the following elements:

- Header: **Forwarding** (blue bar), **ON/OFF**, **VIEW/EDIT**
- Section: **Call Forwarding**
- Section: **Call Forwarding Selective** (grey bar, **OFF**)
- Control: **Call Forwarding Selective:** ☐ On ☒ Off
- Field: **Default Call Forward to number / SIP-URI:**
- Checkbox: ☐ **Play ring reminder when a call is forwarded:**
- Table:

Name	Active	Edit	Delete
test	Yes	Edit 2	Delete 3
- Buttons: **Cancel** (grey), **Add** 1 (blue), **Save** 4 (blue)

Image 24.3

From this page you can:

- 1 – **Add** a new rule.
- 2 – **Edit** an existing rule.
- 3 – **Delete** a rule.
- 4 – **Save** any progress.

Call Notify

Call Notify allows you to receive email notifications containing specific callers' names and numbers based on predefined criteria.

Note: All criteria must be met for an email to be sent.

Use image 25.1 and the following instructions to configure this feature.

1 – Click **Call Notify's View/Edit** arrow.

The screenshot shows a configuration window titled 'Forwarding' with a blue header bar containing 'ON/OFF' and 'VIEW/EDIT'. Below the header, there are three rows: 'Call Forwarding', 'Call Forwarding Selective', and 'Call Notify'. The 'Call Notify' row has a dropdown arrow next to it, which is highlighted with a red circle and the number 1. Below this, there is a text input field labeled '*Send e-mail to:' with a red circle and the number 2 next to it. At the bottom of the window, there are two buttons: 'Save' (highlighted with a red circle and the number 3) and 'Add' (highlighted with a red circle and the number 4). The main content area of the window shows a table with columns 'Active', 'Description', 'Call Notify', 'Call From', and 'Edit'. The table is currently empty, with the text 'No data found' displayed below the header.

Image 25.1

2 – Enter an email address to send the notification.

3 – Click **Save**.

4 – Click **Add**.

Continued on the following page.

CALL NOTIFY

The **Call Notification Criteria** window similar to image 25.2 will load.

Description:

☒ Notify
☐ Do not Notify

Number of Rings – The number of rings before the call is forwarded.

Note: Calls will be forwarded in the same order as they entered above. The process will begin with the first number and finish with the last.

Click **Save** to apply any changes.

Beyond configuring the feature, on this page you can also:

1 – Edit any rule.

2 – Delete any rule.

3 – Add any rule.

Push To Talk

Push to Talk enables automatic answering of Push to Talk calls via speakerphone or intercom. **Push to Talk** can activate the microphone and speaker enabling hands-free communication.

Note: To use this feature, all participants must have **Push to Talk** enabled.

Use image 28.1 and the following instructions to configure this feature.

- 1 – Click **Push To Talk's View/Edit** arrow.

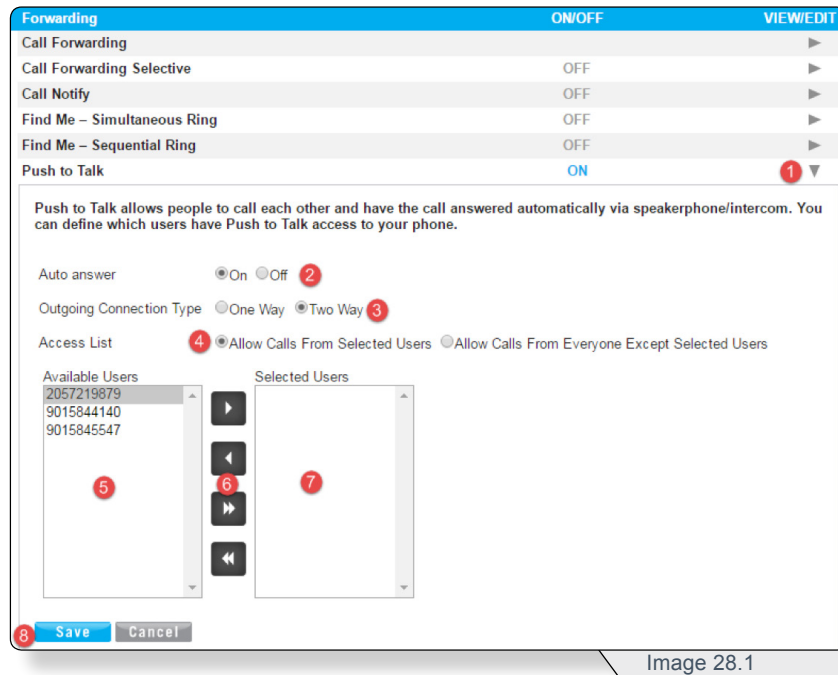

Image 28.1

- 2 – Select **On** or **Off**.
- 3 – Specify one of the following desired communication types:
 - **One Way**: Initiates the call, enabling the caller to speak to the recipient, but the recipient cannot respond to the caller.
 - **Two Way**: Initiates the call allowing the caller and the recipient to communicate freely to each other.
- 4 – Select the action applied to the numbers in the **Selected Users** list.
- 5 – View available users for feature.
- 6 – Use buttons to move users to and from the Selected Users box.
- 7 – View users you have selected for this rule.
- 8 – Click **Save** to apply your settings.

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Messaging

The messaging section contains features directly associated with voicemail setup and delivery.

Messaging	ON/OFF	VIEW/EDIT
Voicemail	ON	▶
Distribution List		▶
Reset Voicemail Pin		▶

Image 29.1

Voicemail

Voicemail configuration allows you to specify how voice messages will be handled, including options to retrieve voice messages using your phone or email.

Use image 30.1 and the following instructions to configure this feature.

1 – Click **Voicemail's View/Edit** arrow.

Messaging **ON/OFF** **VIEW/EDIT**

Voicemail **ON**

Voice Messaging: ☒ On ☐ Off

☐ Send All Calls to Voice Mail

☒ Send Busy Calls to Voice Mail

☒ Send Unanswered Calls to Voice Mail

When a Message arrives:-

☒ Use Unified Messaging

Enter up to five Voicemail to Email Notification Addresses:

Note: When entering multiple email addresses, each entry should be followed by a single comma with no spaces or returns.

☒ Phone Message Waiting Indicator

☐ Forward to this Email- Address:

Additionally:

☐ Notify me by Email of the new message at this address

☒ E-mail a carbon copy of the message to

☐ Transfer on '0' to Phone Number

[Voicemail Greetings](#)

Save

Image 30.1

Fill in the fields with the desired information.

See additional information for select fields below.

Send All Calls to Voice Mail – Sends all calls directly to voicemail

Use Unified Messaging – Voice are messages saved on the voice portal and up to 5 email address to receive notification emails when new voicemails have been received.

Forward to this Email- Address – will forward voicemails to a singular email and will not store the files in the voice portal.

Transfer on “0” to Phone – Allow callers to press 0 and be transferred to a different line. No message is played to callers, so they will need to know of this option in advance.

Voicemail Greetings – Refer to the following **Voicemail Greetings** section of this document.

Click **Save** to apply any changes.

Voicemail Greetings

Voicemail Greetings allows you to control the greeting a caller receives when they reach the line's voicemail.

Selecting **Voicemail Greetings** on the **Voicemail** feature page will load a page similar to image 31.1. For more instructions on how to reach this page refer to the previous **Voicemail** section.

<input type="radio"/>	Audio: Choose File No file chosen

Number of ring before greeting: 3

[Save](#) [Cancel](#)

Image 31.1

Select an option to configure one of the three greeting types:

- **Busy Greeting** – the voicemail played when you are on the line and choose not to answer the second incoming call.
- **No Answer Greeting** – the voicemail played when a call goes unanswered.
- **Alternate No Answer Greetings** – the voicemail played when a call goes unanswered. This feature, however, allows the creation of multiple customized no answer greetings for special purposes (i.e., weekends, vacation, lunch).

Note: There can only be one active **No Answer** greeting at a time, either the **No Answer** or the **Alternate No Answer** greeting.

For each **Personal Greeting** option selected, use the **Browse** button to upload your customized greetings from your computer.

Select the number of times you want calls to ring before a greeting is played for callers.

Click **Save** to save changes.

Distribution List

Distribution List allows up to 15 phone number lists to be configured for forwarding voicemail messages using the voice portal.

Use image 32.1 and the following instructions to configure this feature.

- 1 – Click **Distribution List's View/Edit** arrow.

The screenshot shows the 'Messaging' configuration page for 'Voicemail'. The 'Distribution List' section is active. It includes a 'Distribution list number' selector (0-14), a 'Description' field (My Office Group), a 'Phone Number/SIP-URI' field, an 'Add' button, a table with a 'Delete' checkbox and 'Phone Number / SIPURI' column, and a 'Save' button. Red numbered callouts 1 through 8 highlight specific UI elements.

Image 32.1

- 2 – Select a distribution list number.
- 3 – Enter a list name.
- 4 – Enter a phone number or extension.
- 5 – Click **Add**.

Repeat this step until all phone numbers and extensions have been added.

To remove a number from a distribution list:

- 6 – Check the box adjacent to the corresponding phone number.
- 7 – Click **Delete**.

When finished configuring settings

- 8 – Click **Save** to apply your settings.

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Reset Voicemail PIN

Whenever you reset your **Voicemail Pin**, it will reset back to the default pin (8642).

Use image 33.1 and the following instructions to configure this feature.

1 – Click **Reset Voicemail Pin's View/Edit** arrow.

2 – Click **Reset**.

Clicking **Reset** will load a confirmation message similar to image 33.2.

Mobility

The **Mobility** section has features that extend your voice services beyond your primary phone device.

Anywhere

Anywhere allows you to make business calls from any phone, anytime, anywhere. You can also move calls from one device to another without hanging up, and access business features regardless of the device being used.

Use image 34.1 and the following instructions to configure this feature.

- 1 – Click **Anywhere's View/Edit** arrow.

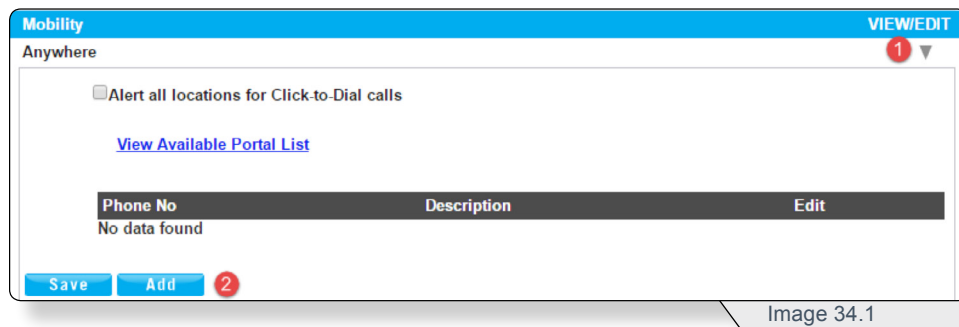

Image 34.1

- 2 – Click **Add**.

A page similar to image 34.2 will load:

Image 34.2

This page has two tabs, Phone Number and Selective Criteria.

Phone Number must be configured and saved first before adding **Selective Criteria**.

Continued on the following page.

ANYWHERE

The **Phone Number** tab is the default display when adding **Anywhere** a line and appears similar to image 34.3.

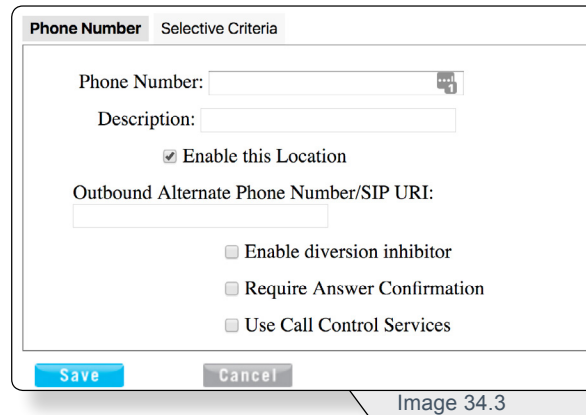

Image 34.3

Fill in the fields with the desired information.

See additional information for select fields below.

Phone number – Enter the number that should ring along with the primary line.

Enable this location – Must be checked to apply **Anywhere** to this location.

Outbound Alternate Phone Number/SIP URI – Use to notify any numbers in the **Specific Phone Numbers** section.

Enable diversion inhibitor – Feature is no longer supported and is pending removal.

Require Answer Confirmation – Requires the line receiving call to press a button when prompted to receive the call.

Click **Save** to apply any changes.

The number will appear under the **Anywhere** section.

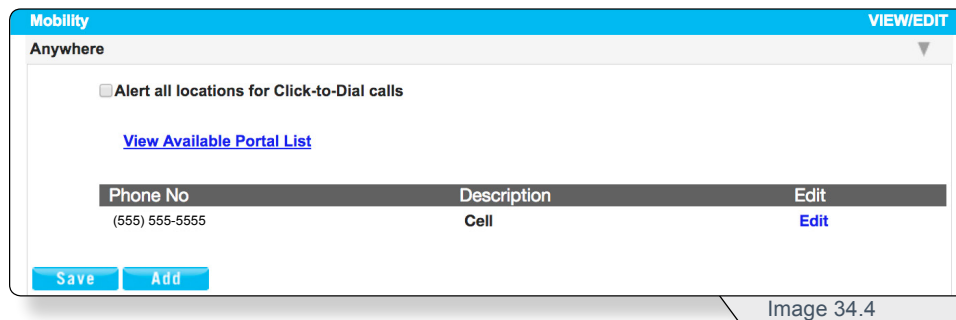

Image 34.4

Anywhere automatically applies to all calls, if you would like this to apply to **Anywhere** to a specific set of calls, you'll need to configure a rule's selective criteria.

To configure a rule's selective criteria, click the corresponding **Edit** button.

Continued on the following page.

ANYWHERE

On the popup window that loads, select the **Selective Criteria** tab and a page similar to image 34.5 will load.

Any Phone number – Use to notify all incoming calls.

Following Phone Numbers – Use to notify any numbers in the Specific Phone Numbers section.

Any Phone Number – Use to notify all calls any caller with their number to private.

Any Unavailable Number – Use to notify any call where caller ID is not available.

Click **Save** to apply any changes.

ANYWHERE

Clicking **Save** will load a page similar to image 35.7

The screenshot shows a web interface with two tabs: 'Phone Number' and 'Selective Criteria'. The 'Phone Number' tab is active, displaying 'Phone Number: 5553331111'. Below this is a table with the following columns: 'Active', 'Description', 'Anywhere', 'Calls From', and 'Edit'. The table contains one row with the following data: 'Active' is checked, 'Description' is 'Daytime Rule', 'Anywhere' is 'Yes', 'Calls From' is 'All calls', and 'Edit' is a blue link with a red circle containing the number '1'. Below the table are four buttons: 'Save' (blue, with a red circle containing '2'), 'Delete' (blue, with a red circle containing '3'), 'Add' (blue, with a red circle containing '4'), and 'Cancel' (grey). A small label 'Image 34.7' is visible in the bottom right corner of the form area.

Active	Description	Anywhere	Calls From	Edit
<input checked="" type="checkbox"/>	Daytime Rule	Yes	All calls	1 Edit

[2 Save](#) [3 Delete](#) [4 Add](#) [Cancel](#)

Image 34.7

Here you have the option to:

- 1 – Edit** an existing rule.
- 2 – Save** and return to the main page.
- 3 – Delete** a rule (check the corresponding **Active** box and click **Delete**).
- 4 – Add** additional rules.

Group

The **Group** tab provides access to all feature and administration settings that apply to your business group.

Note: Your business may not have all of the **Group Features** described in this section; the features are dependent on your service offering. Please contact customer support for additional details.

Group Feature Settings

Within the **Group** tab, the **Group Feature Settings** section contains all group features that can be configured.

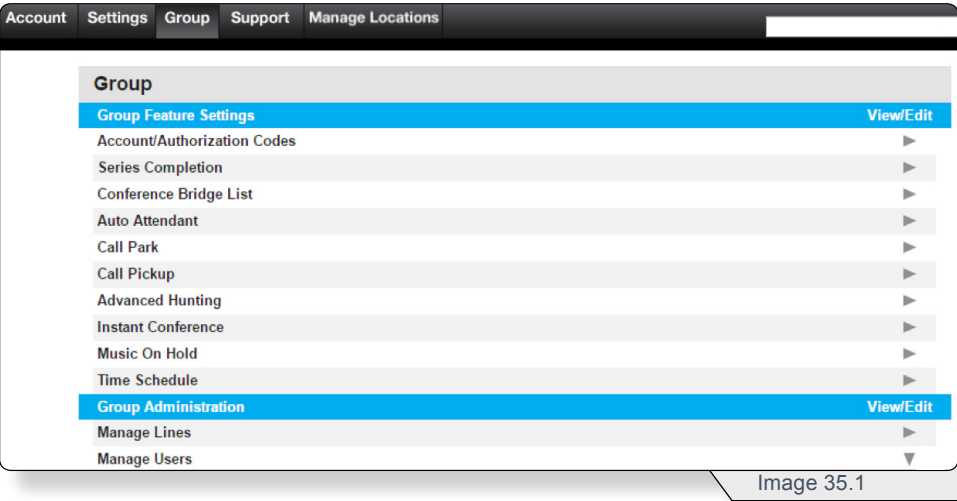

Image 35.1

Account/Authorization Codes

Account Codes allow users to assign certain codes to specified calls for tracking purposes.

Authorization Codes allow the group administrator to select specific users who must enter a valid authorization code when making a call to a party outside of the group. Calls are not connected unless a valid code is entered.

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Use image 36.1 and the following instructions to configure this feature.

- 1 – Click **Authorization Code's View/Edit** arrow.

Image 36.1

- 2 – Select the number of digits employees will be required to enter when placing calls.
- 3 – Click **Add Code**.

Clicking **Add Code** will load the **Add Account/Authorization Codes** page similar to image 36.2.

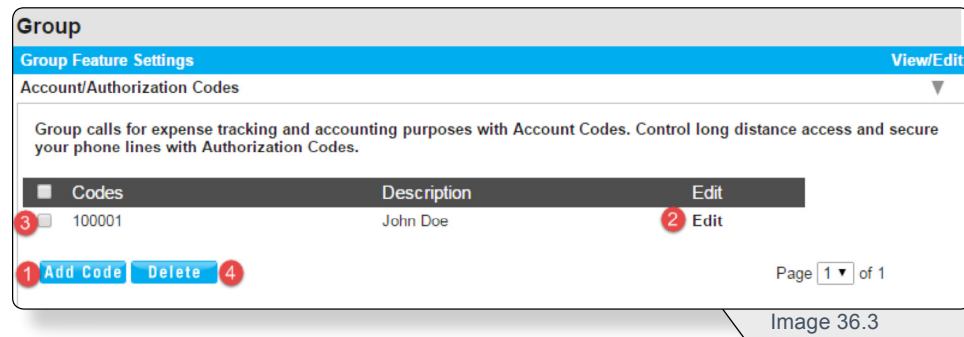

The screenshot shows the 'Add Account/Authorization Code' form. It has two input fields: 'Account/Authorization Code' with the value '100001' (marked with a red 1) and 'Description' with the value 'John Doe' (marked with a red 2). At the bottom, there are 'Save' and 'Cancel' buttons (marked with a red 3).

Image 36.2

- 1 – Enter an account or authorization code with the correct number of digits specified earlier.
- 2 – Enter a name for the code.
- 3 – Click **Save** to create code.

ACCOUNT/AUTHORIZATION CODES

The new account or authorization code will be displayed similar to image 36.3.

From this page you can:

- 1 – **Add** additional account or authorization codes.
- 2 – **Edit** an existing account or authorization code.
- 3 – Check the code's corresponding box.
- 4 – Delete any checked codes.

Note: Provide these **Account/Authorization codes** to your employees as appropriate for the making/tracking of outbound calls.

ACCOUNT/AUTHORIZATION CODES ADMINISTRATION

The administration section is where you can control the feature, and it appears similar to image 36.4.

1 – Set feature type as **Account Codes**, **Authorization Codes** or **Off**.

2 – View the code's number of digit you set previously.

Note: Changing the number of digits will delete all previously configured codes.

3 – Check to allow users to place local and toll-free calls without a code checkbox.

4 – View **Non-Restricted Users** or users not required to enter a code before placing a call.

5 – View **Restricted Users** or users required to enter a before placing a call.

6 – View **Optional Usage** or users who can activate an account code to track a call. This is only available if the feature is setup for Account Codes.

7 – Highlight users and click the appropriate arrow buttons to move them to the desired box.

8 – Click **Save** to apply changes.

ACCOUNT/AUTHORIZATION CODES REPORTS

The reports section is where you can download account or authorization code reports. To access reports, scroll to the bottom of the **Account/Authorization Codes** section.

Use image 36.5 and the following instructions to configure this feature.

Image 36.5

1 – Click **Click here to view Acc/Auth Code Reports**.

A page similar to image 36.7 will load.

Image 36.7

1 – Select the bill date.

2 – Choose a report type.

3 – Click **Run** to create the report.

Advanced Hunting (Hunt Groups)

Advanced Hunting allows calls to be routed amongst available (or “not busy”) agents assigned to a hunt group (a defined group of phone numbers or extensions). When a call is received, the status of each number in the hunt group is checked in a specified sequence until a free line is found. The call is then sent to that phone number or extension. If the call is not answered, it can be routed to the next available agent in the hunt group until all lines have been exhausted or forwarded to another number. Lines that are in use or marked as “blocked” are skipped.

Use image 37.1 and the following instructions to configure this feature.

- 1** – Click **Advanced Hunting’s View/Edit** arrow.

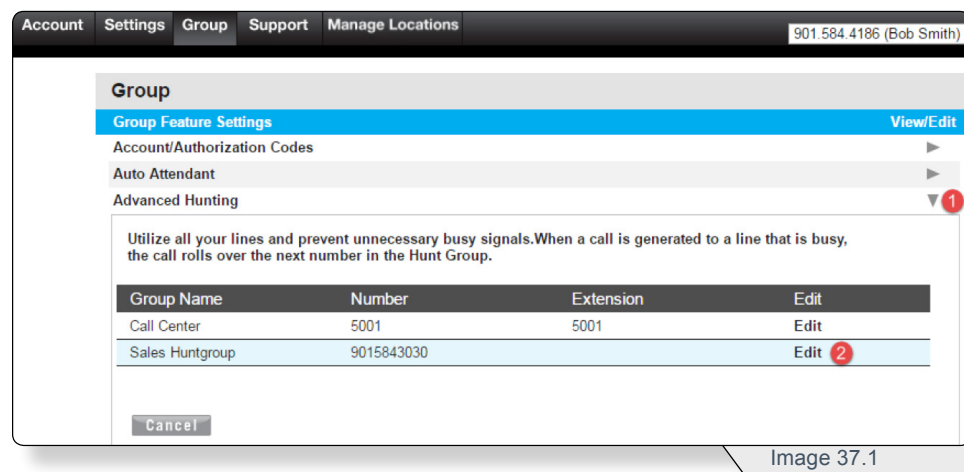

Image 37.1

- 2** – Click **Edit** to configure a hunt group.

Continued on the following page.

Image 37.2

Fill in the fields with the desired information.

See additional information for select fields below.

Calling Line Name – the name displayed to call recipients within the hunt group.

Hunt Style – choose one of options described below:

- **Circular:** calls are routed to the next hunt group member based on who received the last call.
- **Regular (linear):** call routing always follows the sequence of the hunt group member list.
- **Simultaneous:** all idle users within the hunt group are alerted of an incoming call simultaneously.
- **Uniform:** calls are routed based on longest idle time.

Allow Call Waiting on Line – allows call agents to have more than one call at a time directed to them.

Forward calls – forward a call to a specific line if call goes unanswered.

Selected User Order – agent list for the hunt group, can be arranged using the up and down arrows.

Directory Number Hunting – calls to lines listed under this section will route to the hunt group instead of to the individual users.

Click **Save** to apply any changes.

Auto Attendant

Auto Attendant is an automated receptionist that answers the phone and plays a personalized recorded message to callers. **Auto Attendant** has 12 routing options for callers, including dial by name or extension, transfer to the operator or transfer to nine pre-configured phone numbers or extensions (for example, 1 = Marketing, 2 = Sales, and so on).

Note: Refer to the **Phone Features** section of this guide for instructions on how to configure this feature from a phone.

Use image 38.1 and the following instructions to configure this feature.

1 – Click **Auto Attendant's View/Edit** arrow.

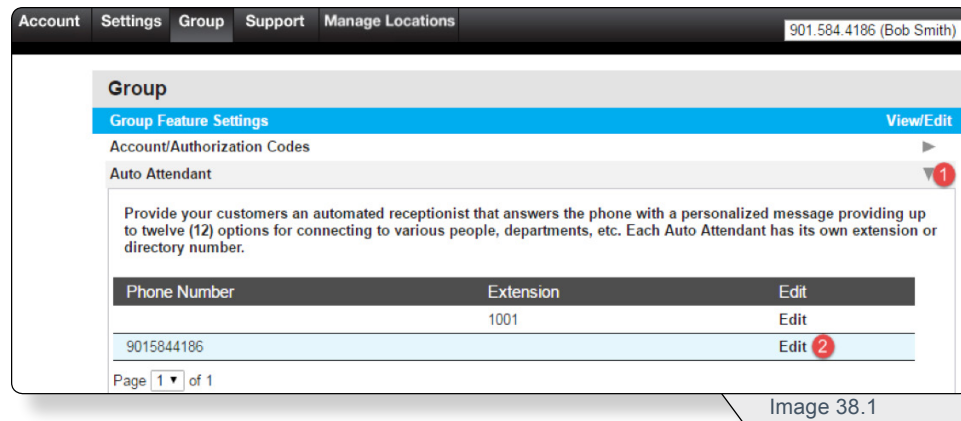

Image 38.1

2 – Click **Edit** for the auto attendant you want to configure.

Continued on the following page.

AUTO ATTENDANT

The **Edit Auto Attendant** page similar to image 38.2 will load.

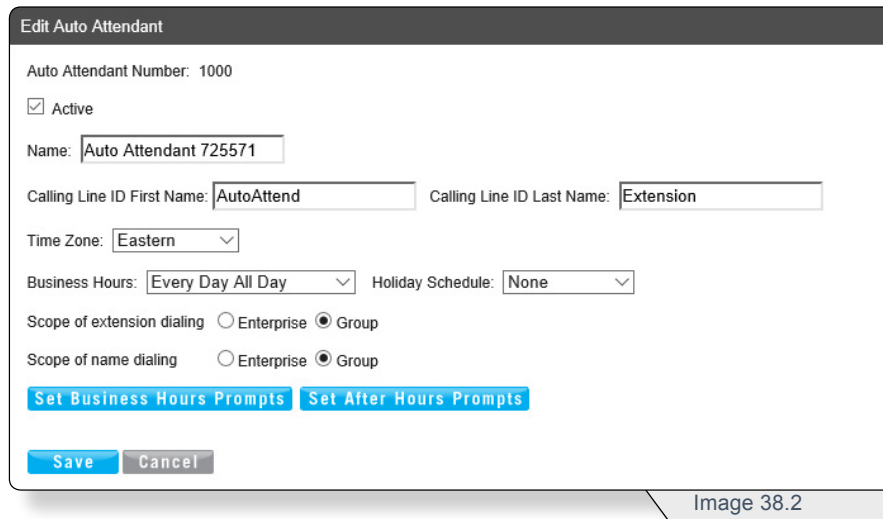

Image 38.2

Fill in the fields with the desired information. See select field information below.

Calling Line Name – name displayed to auto attendant call recipients.

Hunt Style – choose one of options described below:

- **Circular:** calls are routed to the next hunt group member based on who received the last call.
- **Regular (linear):** call routing always follows the sequence of the hunt group member list.
- **Simultaneous:** all idle users within the hunt group are alerted of an incoming call simultaneously.
- **Uniform:** calls are routed based on longest idle time.

Business Hours – select when the auto attendant should be enabled. Schedules are made in the Time Schedule feature.

Holiday Schedule – select the holiday schedule for the auto attendant. Schedules are made in the Time Schedule feature.

Scope of extension dialing – enable extension dialing across the enterprise (company) or the group (a location).

Scope of name dialing – enable name dialing across the enterprise (company) or the group (a location).

Directory Number Hunting – calls are routed to agents' individual phone numbers.

Set Business Hours Prompts – loads page to configure routing options for normal business hours.

Set After Hours Prompts – loads page to configure the routing options for non-business hours.

Click **Save** to apply any changes.

AUTO ATTENDANT

Selecting **Set Business Hours Prompts** or **Set After Hours** prompts will load a configuration page similar to image 38.3

	Description:	Action:	Telephone Number

7			
8			

Image 38.3

Fill in the fields with the desired information. See additional information for select fields below.

Enable First-Level Extension Dialing – enable immediate extension dialing the caller can use at any time.

Description – optional field used to help identify the routing option.

Action – select the appropriate action type to be performed when the routing option is entered. Options include:

Exit: terminates the call.

Extension Dialing: allows caller to enter extension of desired party.

Name Dialing: allows caller to use the directory by name call routing option.

Repeat Menu: replays the menu selection.

***Transfer To Operator:** transfer caller to operator.

***Transfer to Voicemail Box:** transfers caller directly to voicemail.

***Transfer With Prompt:** transfers with a “You are being transferred to . . .” message played.

***Transfer Without Prompt:** directly transfers caller.

*Denotes an action that requires a telephone number to be specified.

Click **Save** when finished configuring.

Call Park

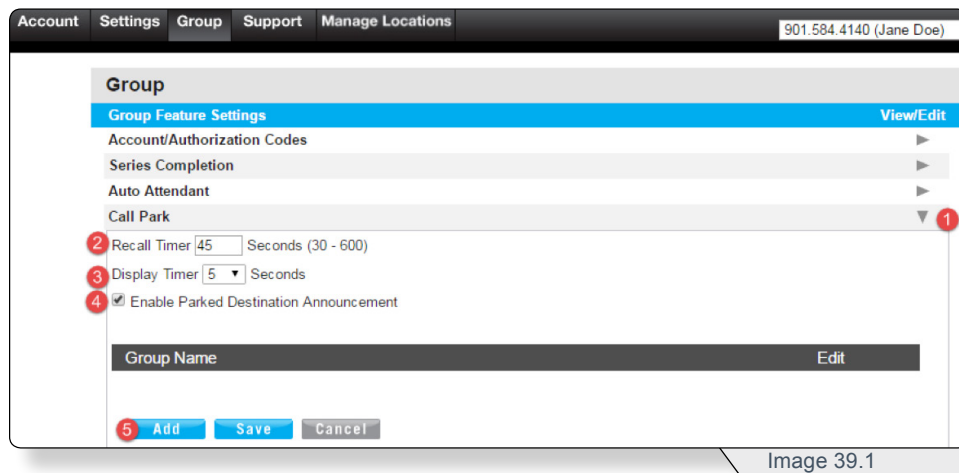

Call Park enables a call to be placed on hold and then retrieved from a different phone in the group.

To park a call, a user presses the flash hook and dials the call park feature access code. The call is parked and the caller is placed on hold. To retrieve the call, use any phone in the group to dial the call retrieve feature access code and the extension that the call was parked against. While parked, the caller will hear music on hold, if the feature is enabled.

To use **Group Call Park** to park a call, the user presses the flash hook during an established call and then dials the Group Call Park feature access code. If no number is entered and the user hangs up immediately after dialing the feature access code, the call is parked against an available user's line.

Use image 39.1 and the following instructions to configure this feature.

- 1 – Click **Call Park's View/Edit** arrow.

- 2 – Set the amount of time a call can remain parked against a specific extension before it is returned to the original call recipient.
- 3 – Set the amount of time a call can remain parked against a group before it is returned to the original call recipient.
- 4 – Check to have the caller hear an announcement that they have been placed in a park location.

Note: **Recall Timer**, **Display Timer** and **Parked Destination Announcement** apply to all call park groups.

- 5 – Click **Add** to create a call park group.

Continued on the following page.

CALL PARK

The **Add Call Park** group configuration page similar to image 39.2 will load.

Add Call Park

Enable people within your organization to park and retrieve calls. Call Park must be turned on by Administrator for an extension to park/retrieve calls.

- 1 – Click **Edit** to make changes to an existing group.

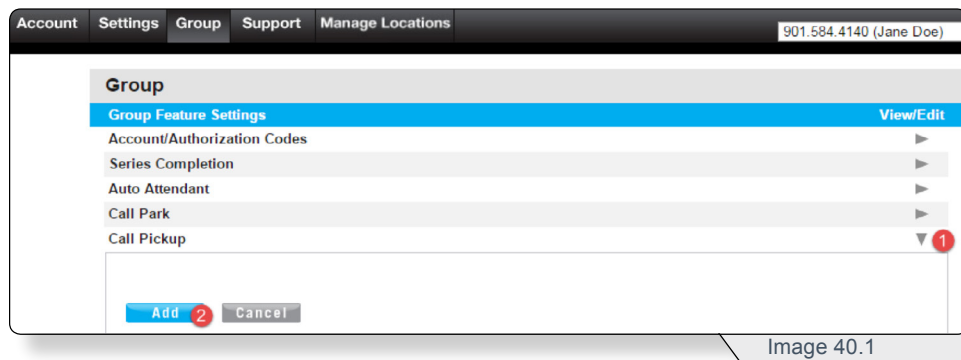

Call Pickup

Call Pickup allows users to answer a call that is ringing at another user's line within their **Call Park** group. If more than one phone is ringing, the phone ringing the longest is the one that is picked up first.

To pick up a ringing call for another user, go off-hook and dial the **Call Pickup** feature access code, which connects them to the calling party.

Use image 40.1 and the following instructions to configure this feature.

- 1 – Click **Call Pickup**'s **View/Edit** arrow.

- 2 – Click **Add** to create a **Call Pickup** group.

Continued on the following page.

CALL PICKUP

The **Add Call Pickup** group configuration page similar to image 40.2 will load.

Image 40.2

- 1 – Enter a **Call Pickup** group name.
- 2 – View and select the available user(s).
- 3 – Move selected users from the **Available Users** to **Selected Users** using the appropriate arrow button.
- 4 – View the Selected Users list.
- 5 – Click **Save** to apply group settings.
- 6 – If desired, **Delete** the **Call Pickup** group.

When a **Call Pickup** group is created it will appear on the **Call Pickup** page similar to image 40.3.

Image 40.3

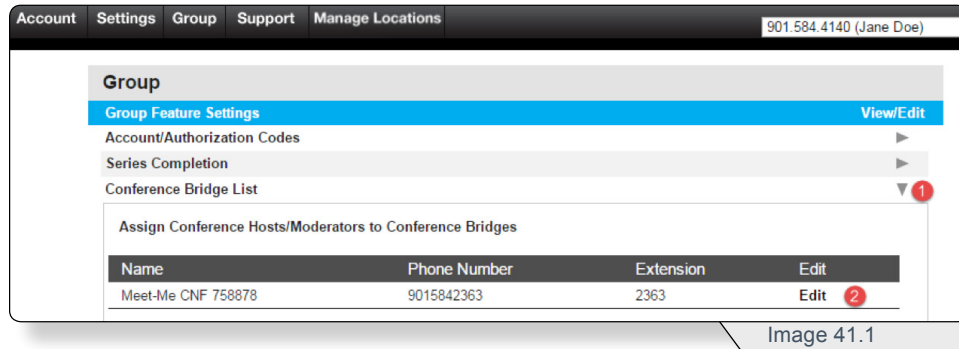

- 1 – Click Edit to make changes to an existing group.

Conference Bridge List

Conference Bridge allows conference administrators to create conference bridges that can be used to hold scheduled, recurring or ad-hoc conferences with internal and external callers.

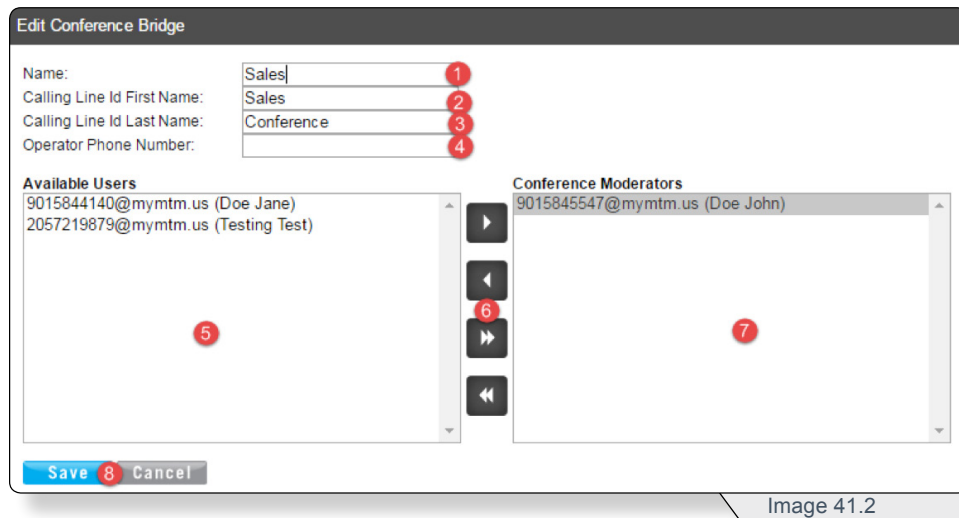

Use image 41.1 and the following instructions to configure this feature.

- 1 – Click **Conference Bridge's View/Edit** arrow.

- 2 – Click **Edit**.

The **Edit Conference Bridge** page similar to image 41.2 will load.

- 1 – Enter a **Conference ID** group name.
- 2 & 3 – Enter the name for the caller ID.
- 4 – Enter a number that a caller will be transferred to if they access the conference bridge menu (by pressing "**") and then select the option to be transferred to the operator (by pressing "0").
- 5 – View and select the available user(s).
- 6 – Use arrow buttons to move selected users to the desired box.
- 7 – View the **Selected Users** list.
- 8 – Click **Save** to apply group settings.

Instant Conference

Instant Conference allows a user to call the phone number assigned to an instant group call group and alert all members in the group. As the members answer, they are joined into a multi-way conference.

Instance Conference members can be part of the same group or can have external phone numbers.

Use image 42.1 and the following instructions to configure this feature.

- 1 – Click **Instance Conference's View/Edit** arrow.

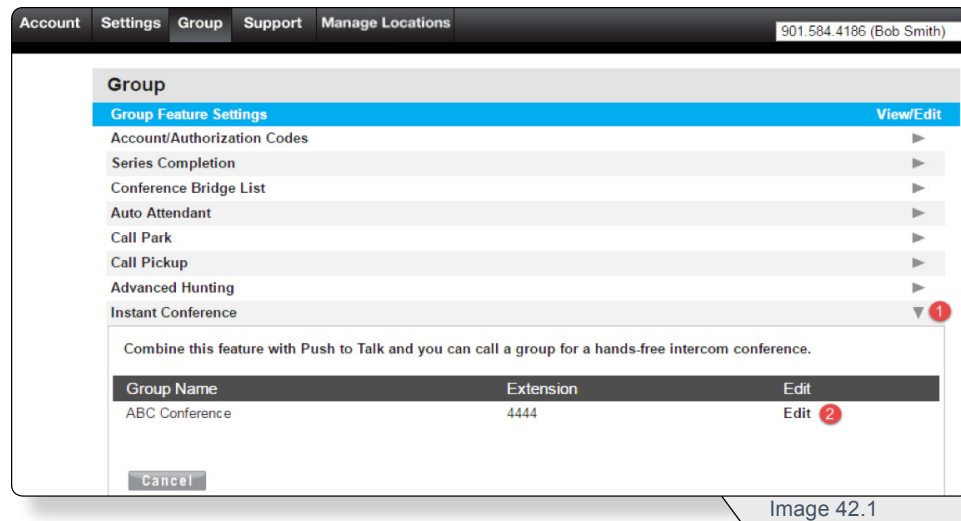

Image 42.1

- 2 – Click Edit.

The **Edit Instant Conference** page similar to image 42.2 will load.

The screenshot shows the 'Edit Instant Conference' page. At the top, there's a 'Name' field with 'ABC Conference' (marked with a red circle and number '1'). To its right is a checkbox labeled 'Enable Maximum Time for Unanswered Calls' (marked with a red circle and number '2') and a 'Minutes' field (marked with a red circle and number '3'). Below this is a section titled 'Enter the numbers that should be included in this Instant Conference' with a table of 5 rows and 4 columns. The second row, third column is marked with a red circle and number '4'. At the bottom are 'Save' (marked with a red circle and number '5') and 'Cancel' buttons.

Image 42.2

- 1 – Modify the **Instance Conference** name.
- 2 – Check to set a maximum time for instant conference call to go unanswered.
- 3 – Enter the number of minutes for the maximum time for unanswered calls.
- 4 – Enter numbers included in the **Instant Conference**.
- 5 – Click **Save** to apply any changes.

Music On Hold

Music On Hold provides the ability to play standard or custom music while callers are on hold.

Use image 43.1 and the following instructions to configure this feature.

- 1 – Click **Music On Hold's View/Edit** arrow.

- 2 – Select **On** or **Off**.
- 3 – Select to play the system's default music.
- 4 – Select to play a customized WAV file.
- 5 – Use to upload your own WAV file.
- 6 – Click **Save** to apply your settings.

Series Completion

Series Completion is used to create an ordered list of phone lines that can be used to reroute calls when the dialed phone line is busy. These calls will overflow to the next phone line in the list until the call is picked up or the end of the list is reached.

Use image 44.1 and the following instructions to configure this feature.

- 1 – Click **Series Completion's View/Edit** arrow.

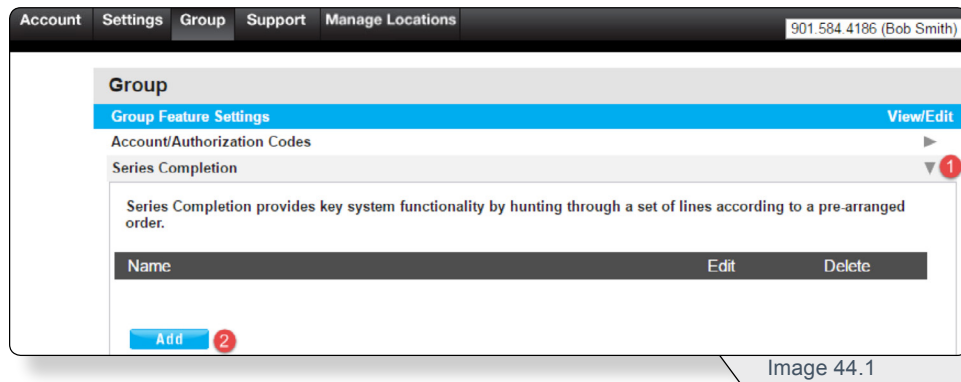

Image 44.1

- 2 – Click **Add**.

The **Add Series Completion** page similar to image 44.2 will load.

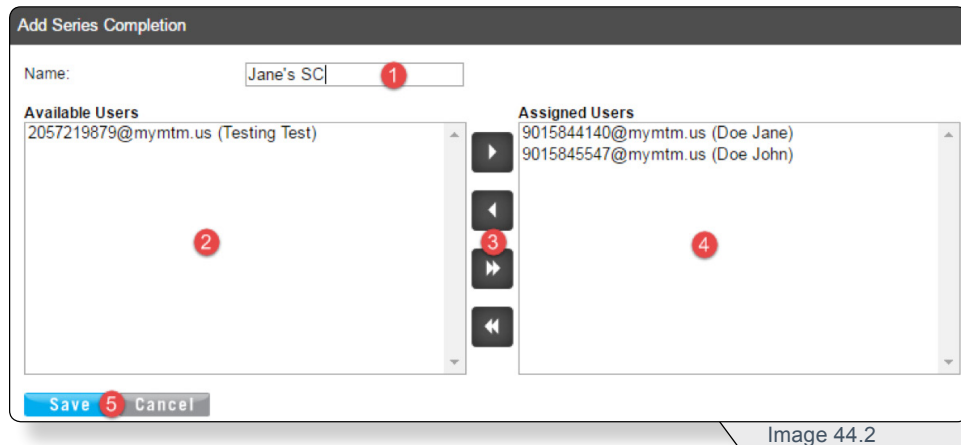

Image 44.2

- 1 – Enter a **Series Completion List** name.
- 2 – View and select the available user(s).
- 3 – Move selected users from the **Available Users** to **Assigned Users** using the arrow buttons.
- 4 – View the **Assigned Users** list.
- 5 – Click **Save** to apply group settings.

Note: Call routing attempts are performed in the same that sequence the numbers appear in the **Assigned Users** box.

SERIES COMPLETION

When a series completion list is created it will appear on the **Series Completion** page similar to image 44.3.

Image 44.3

1 – Click **Edit** to make changes to an existing series completion list.

2 – Click **Delete** to remove a series completion list from service.

Repeat the add series completion process to configure additional **Series Completion** lists.

Time Schedule (Group)

Time Schedules created in the **Group** tab are available to all lines associated to the group.

Use image 45.1 and the following instructions to configure this feature.

- 1 – Click **Time Schedule's View/Edit** arrow.

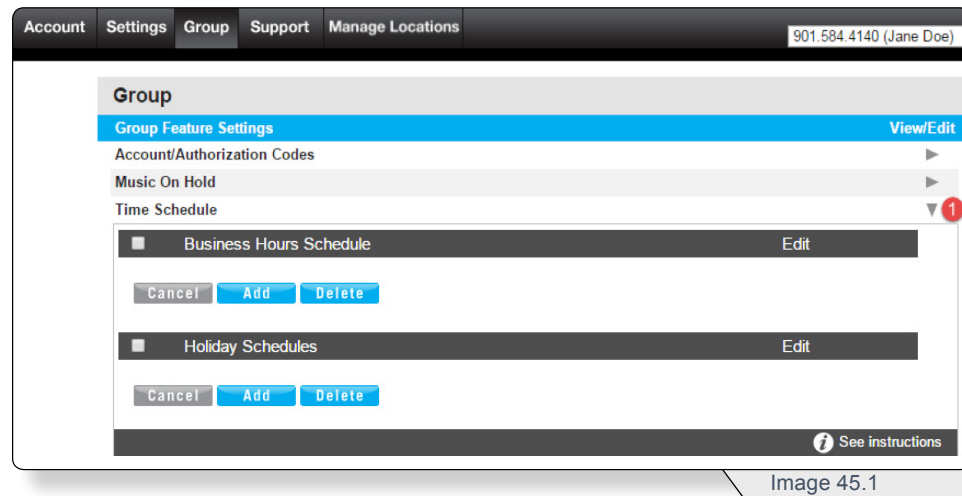

Image 45.1

Note: **Business Hours Schedule** and **Holiday Schedules** are configured using the same process.

Click **Add** to create a schedule.

The following page similar to image 45.2 will load.

Image 45.2

- 1 – Name the schedule.

- 2 – Click **Save**.

Clicking **Save** will add an empty event list to the page similar to image 45.3.

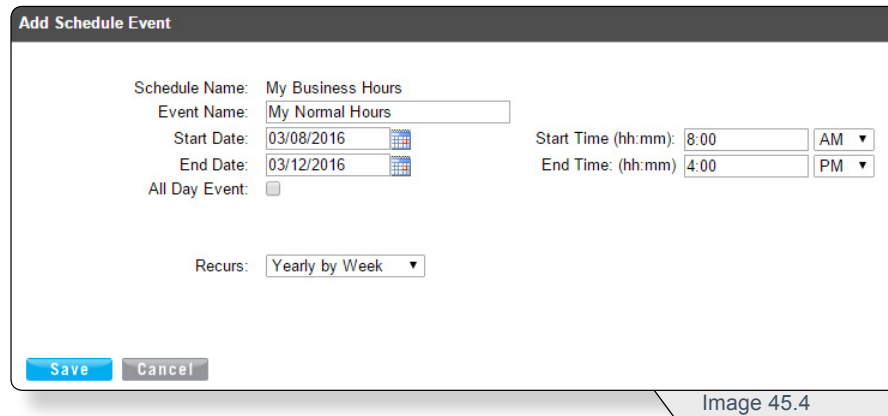

Image 45.3

- 1 – Click **Add** create a new event.

TIME SCHEDULE (GROUP)

Clicking **Add** will load an **Add Schedule Event** page similar to image 45.4

The 'Add Schedule Event' form contains the following fields and controls:

- Schedule Name:** My Business Hours
- Event Name:** My Normal Hours
- Start Date:** 03/08/2016 (with a calendar icon)
- End Date:** 03/12/2016 (with a calendar icon)
- All Day Event:** ☐
- Start Time (hh:mm):** 8:00 AM (with a dropdown arrow)
- End Time (hh:mm):** 4:00 PM (with a dropdown arrow)
- Rekurs:** Yearly by Week (with a dropdown arrow)
- Buttons:** Save (blue), Cancel (grey)

Image 45.4

Fill in the fields with the desired information.

See additional information for a select field below.

Rekurs – choose one of the options below.

Daily (Example: Reoccurs every two days)

Weekly (Example: Every week on Tuesday and Thursday)

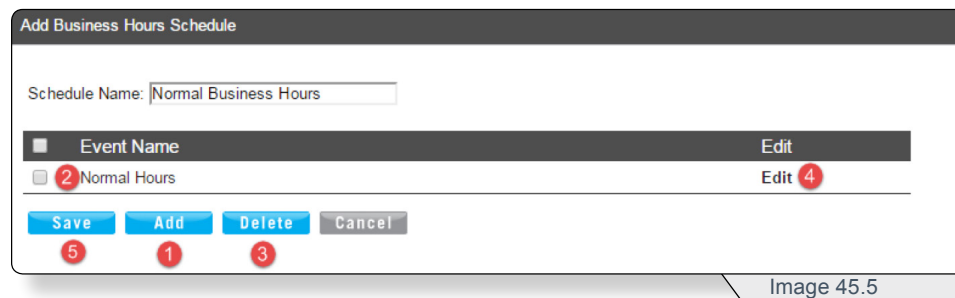

Monthly by day (Example: Every month on the 15th)

Monthly by Week (Example: First Monday of every month)

Yearly by Day (Example: January 5th every year)

Yearly by Week (Example: Second Tuesday in February every 2 years)

Click **Save** when finished configuring. This will display the event in the **Add Business Hours Schedule** view similar to image 45.5.

The 'Add Business Hours Schedule' view displays the following elements:

- Schedule Name:** Normal Business Hours
- Event List:** A table with columns 'Event Name' and 'Edit'. It contains one entry: 'Normal Hours' with a red circle containing the number 2 next to it and a red circle containing the number 4 next to the 'Edit' link.
- Buttons:** Save (blue, with a red circle containing the number 5), Add (blue, with a red circle containing the number 1), Delete (blue, with a red circle containing the number 3), and Cancel (grey).

Image 45.5

On this page you can:

- 1 – Add** more events.
- 2 – Select** an event
- 3 – Delete** a selected event.
- 4 – Edit** an existing event.
- 5 – Save** any changes.

TIME SCHEDULE (GROUP)

When a schedule has been created, it is displayed on the main **Time Schedule** page similar to image 45.6.

On this page you can:

- 1** – Add more events.
- 2 & 5** – Select an event
- 3** – Delete a selected event.
- 4** – Edit an existing event.

Group Administration

The **Group Administration** sections provide a convenient location to manage users and phone lines.

The following sections will discuss how to manage users and the settings that apply as a group to those accounts.

Manage Lines

Manage Lines provides functionality to update phone line user assignments and outbound Caller ID information.

Use image 46.1 and the following instructions to configure this feature.

- 1 – Click **Group Administration's View/Edit** arrow.

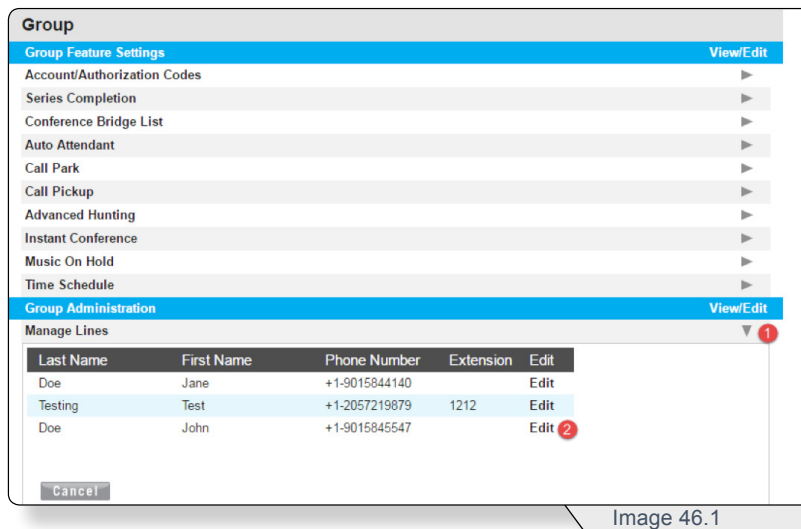

Image 46.1

- 2 – Click **Edit**.

Clicking **Edit** will load the **Edit Line** page similar to image 46.2.

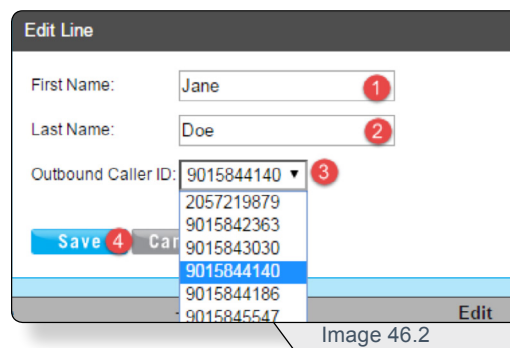

Image 46.2

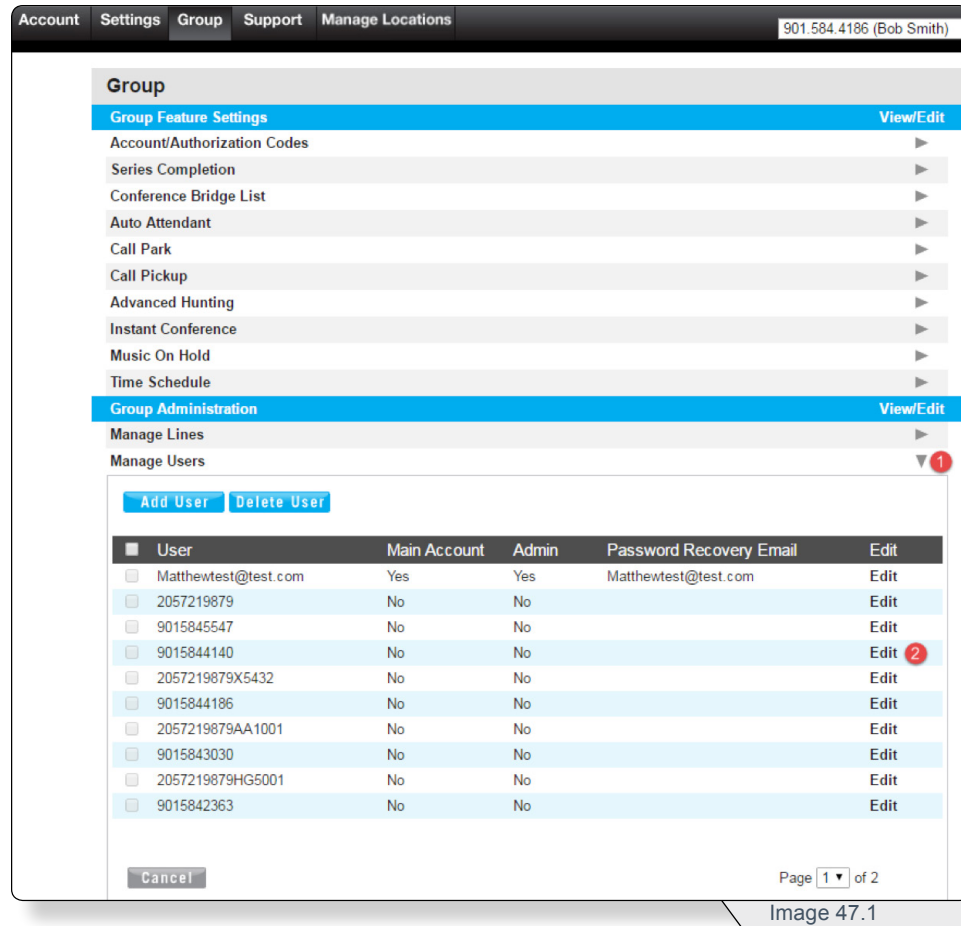

- 1 – Modify the first name.
- 2 – Modify the last name.
- 3 – Modify the number that recipients see as this line's phone number on outgoing calls. This can be different from the actual line.
- 4 – Click **Save** to apply any changes.

Manage Users

Manage Users contains settings for managing individual user rights and password settings.

Use image 47.1 and the following instructions to configure this feature.

1 – Click **Manage Users' View/Edit** arrow.

2 – Click **Edit**.

Continued on the following page.

MANAGE USERS

Clicking **Edit** will load the **Edit User** page similar to image 47.2.

The screenshot shows the 'Edit User' form with the following fields and controls:

- User Name:** 9015844140 (1)
- Password:** [masked] (2)
- Re-enter Password:** [masked] (3)
- Password Recovery Email:** abctest@test.com (4)
- ☐ Assign Administrative Rights (5)
- ☐ Assign Contact Center Manager Rights (6)
- Extension Assignment:**
 - Available Numbers:** 1212, 1001, 5001 (7)
 - User Extensions:** (9)
 - Arrows (8) to move numbers between the two lists.
- Save** (10) and **Cancel** buttons.

Image 47.2

- 1 – View the phone number of the user account being updated.
- 2 – Update this user account's portal password.
- 3 – Re-enter the updated user account's new portal password.
- 4 – Modify the user account's password recovery email.
- 5 – Check to assign this user administrative rights.
- 6 – Check to assign this user contact center manager rights.
- 7 – View and select extension numbers available to be assigned to this user.
- 8 – Use the appropriate arrow button to move the extension numbers.
- 9 – View and select extension numbers assigned to this user.
- 10 – Click **Save** to apply any changes.

Support

The **Support** tab provides access to product documentation including links and support information for additional applications that may be included with your voice services.

Use image 48.1 and the following instructions to access the Support tab.

- 1 – Click **Support** on the navigation bar.

Image 48.1

- 2 – The **Support** section contains links to important information concerning product and service details.
- 3 – The **Apps** section contains links to instructions and downloads for support applications that may be part of your service offering.

Manage Locations

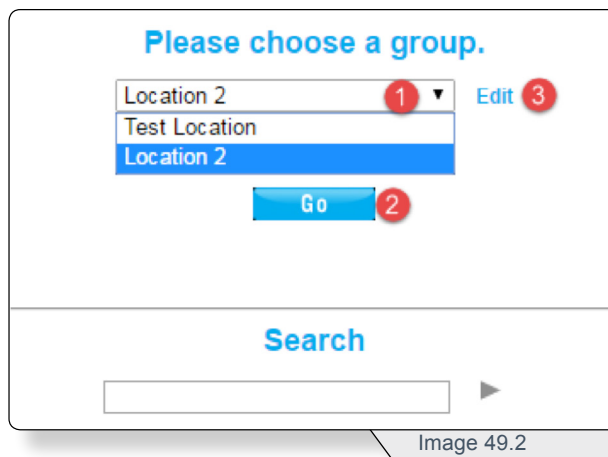

If a company has multiple locations, a user can switch between the locations using the **Manage Locations** tab (see 1 below).

Use image 49.1 and the following instructions to configure this feature.

- 1 – Click **Manage Locations** on the navigation bar.

Selecting the **Manage Location** tab will display a page similar to image 49.2.

- 1 – Select the location you wish to manage.
- 2 – Click **Go** to switch to the new location selection.
- 3 – Click **Edit** to update a location name.

Edit Location Name

Clicking **Edit** will load a page similar to image 49.3.

- 1 – Enter a new **Location Name**.
- 2 – Click **Save** to apply the change.

Search for a Location

Use image 49.4 and the following instructions to configure this feature.

1 – Enter a name or number in the **Search**.

2 – Click the arrow.

Image 49.4 displays an example search with one result returned.

Please choose a group.

2. If you are using a phone that is not within your voice network, dial the 10-digit telephone number for the Auto-Attendant and once connected, dial 9999.
3. Enter the passcode for the Auto-Attendant followed by the # key.
4. Press 1 to change the greeting (record a new custom greeting).
5. Press 1 again to change the Business Hours greeting. Press 2 for the After Hours greeting.
6. Follow the prompts to finish and activate your new greeting.

CALLER ID

1. Dial *68 to permanently enable outbound caller ID block.
Dial *81 to permanently disable outbound caller ID block.
2. Dial *67 and the 10-digit phone number to enable outbound caller ID block for one call.
Dial *82 and the 10-digit phone number to disable outbound Caller ID Block for one call.
3. Listen for a confirmation message.

CALL FORWARDING

1. Dial *72 to enable call forward always.
Dial *73 to disable call forward always.
Dial *94 to enable call forward not reachable.
Dial *95 to disable call forward not reachable.
2. Enter the 10-digit phone number for the call forwarding destination and press #.
3. Listen for a confirmation message.

CALL PARK

1. Press flash or transfer during an active call.
2. Dial *86 to park a call followed by the park destination extension and press #.
Dial *88 to retrieve a parked call followed by the park destination extension and press #.
Dial #58 followed by the park destination extension for group call park.
3. Listen for a confirmation message.

Note: Users can only have one parked call at a time.

CALL PICKUP

1. Dial *89 to answer the line ringing the longest in the call pickup group.
2. Line ringing the longest is picked up if more than one line within the group is ringing.

Note: Multiple call pickup groups may be defined.

CALL TRANSFER

1. Press flash / transfer.
2. Enter appropriate transfer number.
3. Press flash or transfer again.

CALL WAITING

1. Dial *56 to enable.
Dial *57 to disable.
2. Listen for a confirmation message.
3. Dial *70 and enter the appropriate 10-digit phone number to disable for one call.

To Answer:

1. Sound will alert when there is another call.
2. Press flash to put the existing caller on hold and accept the other call.

DO NOT DISTURB

1. Dial *78 to enable.
Dial *79 to disable.
2. Listen for a confirmation message.

HOTELING GUEST / HOTELING HOST

Voice Portal Hoteling Menu:

1. Dial *98.
2. Enter passcode and press #.
3. Dial 7 to change hoteling options.

Hoteling Menu Options:

- [1] To check host status.
- [2] To associate with host.
- [3] To disassociate from host.
- [4] To disassociate from remote host.
- [#] To repeat menu.

Note: Disassociate from the remote host option is only presented for users who have associations with a remote host.

INSTANT CONFERENCE

1. Dial instant conference to call group.
2. For Intercom Dial *50 followed by instant conference extension.
3. Users entered into the instant conference will be alerted.
4. Call ends for entire group when initiator hangs up.

LAST NUMBER REDIAL

Quickly dial the number of the last outgoing call.

1. Dial *66.

PUSH TO TALK

1. Dial *50 followed by appropriate extension.
2. Feature works based on all parties having push to talk enabled.

SPEED DIAL

1. Dial *75 and wait for the tone.
2. Dial appropriate speed dial code followed by the user's 10-digit phone number.
(Example: 03+800-555-1212)
3. Listen for a confirmation message.

To Use Speed Dial:

1. Listen for a dial tone.
2. Dial # followed by appropriate 2-digit speed dial code.

VOICEMAIL

Reset Voicemail Passcode

1. Dial *98.
2. Enter default passcode 8642 and press # (first time setup).
3. Following passcode has expired prompt, enter a permanent passcode and press #.
4. Re-enter permanent passcode and press #.
5. Follow the rest of the prompts to record name and greetings.

To Access Voicemail:

1. From on-network extension: dial *98.
From off-network extension: dial 10-digit phone number and press * when greeting starts.
2. Enter passcode and press #.

Main Voicemail Menu Options:

- [1] To access voicemail.
- [3] Record name.
- [8] To change passcode.
- [9] To exit the voice portal.
- [#] To repeat this menu.
